Great Advices of 27 Great Entrepreneurs

Introduction:

There are many definitions of the concept of 'entrepreneurship'. But my knowledge is coinciding with brain-body-soul at the following:

First you find your skills, then you shine your skills, and then sell your skills….

Or

An individual who undertakes the risk associated with creating, organizing, and owning a business…

So, according to above definition its needs of every person i.e. male/female, girls/boys, young/old, student/businessman, etc.

Entrepreneurship is process through which individuals identify opportunities, allocate resources, and create value. The behavior of the entrepreneur reflects a kind of person willing to put his or her career and financial security on the line and take risks in the name of an idea, spending much time as well as capital on an uncertain venture. Person that has potential for bringing positive change is called entrepreneur.

Entrepreneurs occupy a central position not only in a market economy but also in the personal life of any person. For it's the entrepreneurs who serve as the spark plug in the economy's engine, activating and stimulating all economic activity and play an extra-ordinary role in socially. The economic and social success of nations worldwide is the result of encouraging and rewarding the entrepreneurial instinct.

Mostly society is prosperous only to the degree to which it rewards and encourages entrepreneurial activity because it is the entrepreneurs and their activities that are the critical determinant of the level of success, prosperity, growth and opportunity in any economy. The most dynamic societies in the world are the ones that have the most entrepreneurs, plus the

economic and legal structure to encourage and motivate entrepreneurs to greater activities.

For years, economists viewed entrepreneurship as a small part of economic activity. But in the 1800s, the Austrian School of Economics was the first to recognize the entrepreneur as the person having the central role in all economic activity. Why is that?

Because it's entrepreneurial energy, creativity and motivation that trigger the internal potential and skills so at the result of by product, production and sale of new products and services are coming. It is the entrepreneur who undertakes the risk of the enterprise in search of profit and who seeks opportunities to profit by satisfying as yet unsatisfied needs.

Entrepreneurs seek disequilibrium--a gap between the wants and (true)needs of customers and the products and services that are currently available. The entrepreneur then brings together the factors of production necessary to produce, offer and sell desired products and services. They invest and risk their money--and other people's money--to produce a product or service that can be sold at a profit.

More than any other member of our society, entrepreneurs are unique because they're capable of bringing together the money, raw materials, manufacturing facilities, skilled labor and land or buildings required to produce a product or service (and its garbage are approximately zero). And they're capable of arranging the marketing, sales and distribution of that product or service or we can say that they use their all skills.

Entrepreneurs are optimistic and future oriented; they believe that success is possible and are willing to risk their resources in the pursuit of profit. They're fast moving, willing to try many different strategies to achieve their goals of profits. And they're flexible, willing to change quickly when they get new information, its shows that the habit of risk taking.

Entrepreneurs are skilled at selling against the competition by creating perceptions of difference and uniqueness in their products and services. They continually seek out customer (true)needs that the competition is not satisfying and find ways to offer their products and services in such a way that what they're offering is more attractive than anything else available its shows that they have eagle’s eye on needs and their products.

Entrepreneurs are a national (and also international) treasure, and should be protected, nourished, encouraged and rewarded as much as possible. They create all wealth, all jobs, all opportunities, and all prosperity in the nation. They're the most important people in a market economy--and there are never enough of them.

As an entrepreneur, you are extremely important to world. Your success is vital to the success of the nation and also world. To help you develop a better business (better use of skills), one that contributes to the health of the economy, I'm going to suggest that you take some time to sit down, answer the following questions, and implement the following actions:

What opportunities exist today for you to create or bring new products or services to your market that people want, need and are willing to pay for? What are your three best opportunities?

1. Find your own skills. (formula of finding skills, I have written in “habits changing book”)
2. Study carefully the journey from comfort to success zone.
3. Identify the steps you could take immediately to use your own skills and on the behalf of these skill to operate your business more efficiently, especially regarding internal operating systems.
4. Tell yourself continually motivational quotes as "Failure is not an option."
5. Use your creativity rather than your money to find new, unique, better, cheaper ways to sell your products or reduce your costs of operation. What

could you do immediately in one or both of these areas?

6. Imagine starting over. Is there anything you're doing today that, knowing what you now know, you wouldn't get into or start up again? (for this use my book “Time Topology”.
7. Imagine reinventing your business. If your business burned to the ground today, and you had to start over, what would you not get into again? What would you do differently

In this book I will try to explain experience of great 25 worlds successful entrepreneurs by the help of autobiography and life suggestions…

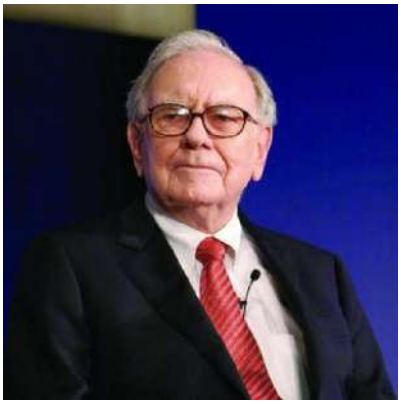
Warren Buffett

(American Business Magnate, Investor, and Philanthropist)



Warren Buffett's name is practically synonymous with his biggest success. Warren became an integral part of Berkshire Hathaway in the early 1960s and helped the company expand into one of the largest conglomerates in the world. In 1956, his path to success began to accelerate when he moved back to Nebraska with his family.

Before working for Benjamin Graham, Warren had been an investment salesman – a job that he liked doing, except when the stocks he suggested dropped in value and lost money for his clients. To minimize the potential of having irate clients, Warren started a partnership with his close friends and family. The partnership had unique restrictions attached to it: Warren himself would invest only $100 and, through re-invested management fees, would grow his stake in the partnership. Warren would take half of the partnerships gains over 4% and would repay the partnership a quarter of any loss incurred. Furthermore, money could only be added or withdrawn from the partnership on December 31st, and partners would have no input about the investments in the partnership.

By 1959, Warren had opened a total of seven partnerships and had a 9.5% stake in more than a million dollars of partnership assets. Three years later, Warren was now a millionaire and merged all his partnerships into a single entity.

Sagheer Ahmed

In 1962, Warren saw an opportunity to invest in a New England textile company called Berkshire Hathaway and bought some of its stock. Warren began to aggressively buy shares after a dispute with its management convinced him that the company needed a change in leadership. Ironically, the purchase of Berkshire Hathaway is one of Warren's major regrets.

Understanding the beauty of owning insurance companies – clients pay premiums today to possibly receive payments decades later – Warren used Berkshire Hathaway as a holding company to buy National Indemnity Company (the first of many insurance companies he would buy) and used its substantial cash flow to finance further acquisitions.

As a value investor, Warren is a sort of Jack-of-all-trades when it comes to industry knowledge. Berkshire Hathaway is a great example. Buffett saw a company that was cheap and bought it, although he wasn't an expert in textile manufacturing. Over the decades, Warren has bought, held and sold companies in a variety of different industries.

Some of Berkshire Hathaway's most well-known subsidiaries are, but not limited to, GEICO (yes, that little Gecko belongs to Warren Buffett), Dairy Queen, NetJets, Benjamin Moore & Co., and Fruit of the Loom. Again, these are only a handful of companies of which Berkshire Hathaway has a majority share.

The company also has interests in many other companies, including American Express Co. (AXP), Costco Wholesale Corp. (COST), Direct TV (DTV), General Electric Co. (GE), General Motors Co. (GM), Coca-Cola Co. (KO), International Business Machines Corp. (IBM), Wal-Mart Stores Inc. (WMT), Proctor & Gamble Co. (PG) and Wells Fargo & Co. (WFC).

(related: How Does Warren Buffett Choose the Companies He Buys?)

Business for Buffett hasn't always been rosy though. In 1975, Buffett and his business partner, Charlie

Munger, were investigated by the Securities and Exchange Commission (SEC) for fraud. The two maintained that they had done nothing wrong and that the purchase of Wesco Financial Corporation only looked suspicious because of their complex system of businesses.

Further trouble came with a large investment in Salomon Inc. In 1991, news broke of a trader breaking Treasury bidding rules on multiple occasions, and only through intense negotiations with the Treasury did Buffett manage to stave off a ban on buying Treasury notes and subsequent bankruptcy for the firm.

In more recent years, Buffett has acted as a financier and facilitator of major transactions. During the Great Recession, Warren invested and lent money to companies that were facing financial disaster. Seven years later, the effects of these transactions are surfacing and they're enormous:

- A loan to Mars Inc. resulted in a $680 million profits
- Wells Fargo & Co. (WFC), of which Berkshire Hathaway bought almost 120 million shares during the Great Recession, is up 6.75 times from its 2009 low
- American Express Co. (AXP) is up about five times since Warren's investment in 2008
- Bank of America Corp. (BAC) pays $300 million a year and Berkshire Hathaway has the option to buy additional shares at around $7 each – less than half of what it trades at today
- Goldman Sachs Group Inc. (GS) paid out $500 million in dividends a year and a $500 million redemption bonus when they repurchased the shares.

Most recently, Warren has partnered up with 3G Capital to merge J.H. Heinz Company and Kraft Foods to create the Kraft Heinz Food Company (KHC). The new company is the third largest food and beverage company in North America and fifth largest in the world, and boasts annual revenues of $28 billion.

Modesty and quiet living meant that it took Forbes some time to notice Warren and add him to the list of richest Americans, but when they finally did in 1985, he was already a billionaire. Early investors in Berkshire Hathaway could have bought in as low as $275 a share and by 2014 the stock price had reached $200,000, and was trading around $220,000 earlier this year

First Entrepreneurial Venture:
By the age of 13, Buffett was running his own businesses as a paperboy and selling his own horseracing tip sheet. That same year, he filed his first tax return, claiming his bike as a $35 tax deduction.

In 1942, Buffett's father was elected to the U.S. House of Representatives, and his family moved to Fredricksburg, Virginia, to be closer to the congressman's new post. Buffett attended Woodrow Wilson High School in Washington, D.C., where he continued plotting new ways to make money. During his high school tenure, he and a friend purchased a used pinball machine for $25. They installed it in a barbershop, and within a few months the profits enabled them to buy other machines. Buffett owned machines in three different locations before he sold the business for $1,200.

Business Empire
Despite the success of Buffett Partnership, its founder dissolved the firm in 1969 to focus on the development of Berkshire Hathaway. He phased out its textile manufacturing division, instead expanding the company by buying assets in media (*The Washington Post*), insurance (GEICO) and oil (Exxon). Immensely successful, the "Oracle of Omaha" even managed to spin seemingly poor investments into gold, most notably with his purchase of scandal-plagued Salomon Brothers in 1987.

Following Berkshire Hathaway's significant investment in Coca-Cola, Buffett became director of the company from 1989 until 2006. He has also served as director

Saghe

of Citigroup Global Markets Holdings, Graham Holdings Company and The Gillette Company.

Recent Activity and Philanthropy

In June 2006, Buffett made an announcement that he would be giving his entire fortune away to charity, committing 85 percent of it to the Bill and Melinda Gates Foundation. This donation became the largest act of charitable giving in United States history. In 2010, Buffett and Gates announced they had formed The Giving Pledge campaign to recruit more wealthy individuals for philanthropic causes.

In 2012, Buffett disclosed that he had been diagnosed with prostate cancer. He began undergoing radiation treatment in July, and successfully completed his treatment in November.

The health scare did little to slow the octogenarian, who annually ranks near the top of the *Forbes* world billionaires list. In February 2013, Buffett purchased H. J. Heinz with private equity group 3G Capital for $28 billion. Later additions to the Berkshire Hathaway stable included battery maker Duracell and Kraft Foods Group, which merged with Heinz in 2015 to form the third-largest food and beverage company in North America.

Suggestions from Buffet to entrepreneurs:

1-Never depend on single income, make investment to create a second source.

2-If you buy things you do not need, soon you will have to sell things you need.

3-Do not save what is left after spending, but spend what is after saving.

4-Never test the depth of river with both legs.

Sagheer Ahmed

5-Do not put all eggs in one basket.

6-Honesty is very expensive gift, do not expect it from cheap people…

7-Price is what you pay. Value is what you get.

8-Chains of habit are too light to be felt until they are too heavy to be broken.

9-It takes 20 years to build a reputation and five minutes to ruin it. If you think about that, you'll do things differently.

10- Someone's sitting in the shade today because someone planted a tree a long time ago.

11-Risk comes from not knowing what you're doing.

12-It's only when the tide goes out that you discover who's been swimming naked.

13-It's far better to buy a wonderful company at a fair price than a fair company at a wonderful price.

Sagheer Ahmed

002

Bill Gates

(Technical advisor of Microsoft, entrepreneur)

Entrepreneur and businessman Bill Gates (born October 28, 1955) and his partner Paul Allen founded and built the world's largest software business, Microsoft, through technological innovation, keen business strategy and aggressive business tactics. In the process, Gates became one of the richest men in the world.

Inspiration for Bill Gates:

Henry Edward Roberts, the developer of an early personal computer that inspired Bill Gates to found Microsoft, has died aged 68. He had been battling pneumonia for several months. The man better known as Ed Roberts developed and marketed the MITS Altair 8800 in the 1970s.

Starting of business:

Bill Gates did not graduate from Harvard; instead, he left Harvard during his junior year to start the company that has made him so famous and the richest person in the world (according to Forbes), Microsoft Corporation. Microsoft was formed in 1975 and it has completely changed the way the world uses computers today.

Consider as an Entrepreneur:

Entrepreneur's Hall of Fame: Bill Gates. Born 1955, Bill Gates is the Chairman and CEO of Microsoft Corporation, the world's largest computer software

company. Microsoft was co-founded with Paul Allen in 1975 and has become the standard for PC operating systems and software for personal and business use.

How can Bill become rich?

This Is the Man Making Bill Gates So Rich. Bill Gates is worth an astounding $81.6 billion and he keeps getting richer every year. ... At one time, Gates' wealth depended solely on Microsoft. But for years he's been selling off his Microsoft stake.

Suggestions from Gates to entrepreneurs:

1-Your most unhappy customers are your greatest source of learning.

2-Success is a lousy teacher. It seduces smart people into thinking they can't lose.

3-It's fine to celebrate success but it is more important to heed the lessons of failure.

4-As we look ahead into the next century, leaders will be those who empower others.

5-If you can't make it good, at least make it look good.

6-Technology is just a tool. In terms of getting the kids working together and motivating them, the teacher is the most important.

7-The Internet is becoming the town square for the global village of tomorrow.

8-Television is not real life. In real life people actually have to leave the coffee shop and go to jobs.

9-I believe that if you show people the problems and you show them the solutions they will be moved to act.

10-The world does not care about your self-esteem, the world will expect you to accomplish something BEFORE you feel good about yourself.

11-You will not make 60,000/- $ a year right out of high school, you won't be a vice-president with a car phone until you earn both.

12-Flipping burgers is not beneath your dignity, your Grand-parents had a different word for burger flipping, they called it opportunity.

13-If you mess-up, it's not your parents' fault, so don't whine about your mistakes, learn from them.

14-Your school may have done away with winners and losers, but life has not, in some school, they have abolished failing grades and they will give you as many times as you want to get the right answer, this does not bear the slightest resemblance to any- thing in real life.

15-life is not divided into semesters, you don't get summers off and very few employers are interested in helping you find yourself, do that on your own time

Sagheer Ahmed

003

Mehmood Bhatti

(Pakistani French Fashion Designer, Entrepreneur)

Mehmood Bhatti is a Pakistani French fashion designer. Born in Lahore in 1958, Pakistan, Bhatti immigrated to France in 1976, where he established himself as fashion designer.

An internationally applauded Pakistani French Designer, Mehmood Bhatti belongs to Lahore but has spent almost 35 years in Paris. This stupendous designer paid a lot to accomplish his dreams. In 1977, he got his graduation from Government College University and for further studies he went to Paris and completed his MBA there, when he left for Paris he had no money but he soon found a job in a retail boutique, where he was appointed as a cleaner, then a packager and then became a gregarious salesman. After struggling a lot, he pursues a career in fashion designing in 1980 and established his own retail outlet.

In a limited time, he flourished his business and now almost five hundred designers are working for him. Bhatti is his brands name which is a multi-million-dollar Translatic Company. In almost ten countries he has established his company and had a turnover of about 150 million francs and Paris City Hall has rewarded him a special medallion "Travail et Merite" for his achievements.

Moreover, he has received Sitar e Imtiaz on 23rd March 2004, which is the highest honor bestowed to a civilian. In his autobiography that is "Another Life in Paris" much of his early life has been documented and even in the docu-film La Verite Si Je Mens (The Truth If I Lie).

Bhatti was renowned as the best manufacturer of the Sebtier in 1990 and almost nine million people saw his documentary film in 1996. Bhatti leading in the fashion industry of the world, Paris, France is recognized among the paramount fashion designers of the world. In Finland, Japan, UK, USA, Germany, Switzerland, Poland, India and Taiwan he has established its brands outlets. He designs both for Menand Women and his products includes bridal and formal wear, Shirts, pants, evening and party dresses and many more.

Bhatti is proud of being Pakistani despite of enjoying the repute of being one of the leading fashion designer. After hitting the peak, he wishes to contribute to the social welfare of his motherland. Over and beyond he has contributed massively in the sectors of health and education and supports hundreds of orphans and widows in the motherland. He has his own signature style that is completely admired by everyone. He is a true Pakistani lover and his message to Pakistanis is that "Please look after your bodies and wear good fashion."

Suggestion from Bhatti:

1- Habit of shyness is too dangerous for you, too much easily kill your growth…

2- Success and failure are the parts of life, if you are not feeling shyness on success so why are you show it on failure…

3- Anxiety or un-peaceful mind are the killer of creativity…

4- Everybody leaves you alone but not Allah…

5- In other country you find the person of native country whether he is friend or not…

6- Success always waiting for SMART worker…

7- Money lover treat you like a dog if you are a beggar for any reason…

8- My second birth is important as compare to first…

Sagheer Ahmed

004

Jack Ma

(Founder of Alibaba group, Entrepreneur)

Fresh off the biggest IPO in history, Alibaba founder and chairman Jack Ma is now the richest person in China. Ma is now worth an estimated $25 billion, which includes his 7.8% stake in Alibaba and a nearly 50% stake in payment processing service Alipay.

Ma was born in Hangzhou, Zhejiang Province, China. Ma started to study English at a young age and practiced English daily by conversing with English-speakers at Hangzhou international hotel, a 70-min bike ride from his home. He would give them tours around the city for free to improve his English. He did this for nine years. He became pen pals with one of those foreigners, who nicknamed him "Jack" because he found it hard to pronounce his Chinese name.

Later in his youth, Ma struggled attending college. The Chinese entrance exams are held only once a year and it took Ma four years to pass. After that, Ma attended Hangzhou Teacher's Institute (currently known as Hangzhou Normal University) and graduated in 1988 with a B.A. in English. While at school, Ma was head of the student council. After graduation, he became a lecturer of English and International Trade at Hangzhou Dianzi University. He later enrolled at Beijing-based Cheung Kong Graduate School of Business (CKGSB) and graduated in 2006.

In 1999, after leaving the government job, Ma took a second bite at internet-based business ventures by grouping 18 people (including himself and his wife) at his home and sold them a dream to found Alibaba with the goal of facilitating international trade for small

and medium ventures based in China. Alibaba was born out of Ma's unfulfilled dream of using the internet to facilitate business activities for Chinese SMEs and frustration with the bureaucrats he worked with in the preceding joint venture (Chinapage), where his suggestions to use the internet to facilitate trade of Chinese made products in the international market were repeatedly rejected.

In the early stages of the Alibaba, Ma tried to raise funds in Silicon Valley, the tech hub in the United States and was met with denials, and his business model was criticized to be unprofitable and unsustainable by many at the time. Eventually, Ma succeeded in getting Goldman Sachs and Softbank to invest USD 5 Million and USD 20 Million in Alibaba, respectively.

In 2003, still unprofitable with Alibaba, Ma and his team lunched an online auction site named "Taobao.com", charging zero commission, and took on a multinational e-commerce giant, eBay, which already had the lion share of the Chinese online auction market. Determined to win against eBay, Taobao remained a commission-free marketplace for millions of online traders, and that did put Alibaba under significant financial strain. To stay afloat while maintaining the platform's commission-free policy, Ma and his team began offering peripheral value-added support services (e.g. custom webpages to online merchants) for small fees. Ma and his team won the Chinese market in less than five years, and eBay subsequently withdrew from China. Jack Mack reflected on this challenging period on a YouTube video of his interview with Charlie Rose, stating "If eBay are the sharks in the Ocean, we (Alibaba and Taobao) are the crocodiles in the Yangtze River." Since then, Alibaba has created many subsidiaries through organic growth (such as Tmall and AliExpress) and acquisitions.

As the "dot com" boom period came to an end after 2000, Alibaba faced serious challenges due to its aggressive expansion into international markets (which Ma admitted being a mistake). Jack Ma successfully reorganized the company's operations, including closing many

international branches and focusing on strengthening Alibaba's position in the Chinese market. Thereafter, Ma expanded the services of Alibaba and reengaged its international expansion strategy.

After Ma and Alibaba reorganized their operations and made their Mark by driving eBay out of China after just few years in business, with the help of Jerry Young of Yahoo, Ma succeed in getting Yahoo to invest a sizable USD 1 Billion for a 40% stake in Alibaba in 2005. Besides getting crucial funds to help Alibaba to execute its international growth strategy, that Investment earned Alibaba (a six-year-old company) a valuation of USD 2.5 Billion.

In 2014, in what turned out to be the largest initial public offering to date, Ma and his team successfully raised more than USD 20 Billion for Alibaba by listing it in the NYSE stock exchange in the United States. That made Alibaba, a 15 years old e-commerce company that has its origins outside of the United States, one of world's largest companies as measured by its market capitalization that was approximately USD 200 Billion. Ma and his team are turning Alibaba holding group into a massive conglomerate by acquiring many smaller companies from technology related to logistics and beyond.

Suggestions from Ma to entrepreneurs:

1-No matter how tough the chase is; you should always have the dream you saw on the first day. It'll keep you motivated and rescue you (from any weak thoughts).

2-Help young people. Help small guys. Because small guys will be big. Young people will have the seeds you bury in their minds, and when they grow up, they will change the world

3-Without internet, there would have been no Jack Ma, and no Alibaba or Taobao."

Sagheer Ahmed

4-I'm not a tech guy. I'm looking at the technology with the eyes of my customers, normal people's eyes.

5-Never ever do business with the government. Be in love with them, never marry them."

6-We should never finish a 20 years' program in two years

7-If you don't give up, you still have a chance. Giving up is the greatest failure.

8-When you are small, you have to be very focused and rely on your brain, not your strength.

9-I don't want to be liked. I want to be respected

10-You should learn from your competitor, but never copy. Copy and you die.

11-It doesn't matter if I failed. At least I passed the concept on to others. Even if I don't succeed, someone will succeed.

12-We're never in lack of money. We lack people with dreams, (people) who can die for those dreams.

13-Never give up. Today is hard, tomorrow will be worse, but the day after tomorrow will be sunshine

14-You need the right people with you, not the best people.

Sagheer Ahmed

005

Mark Zuckerberg

(Co-founder of Facebook, Entrepreneur)

Born on May 14, 1984, in White Plains, New York, **Mark Zuckerberg** co-founded the social-networking website Facebook out of his college dorm room. He left Harvard after his sophomore year to concentrate on the site, the user base of which has grown to more than 250 million people, making **Zuckerberg** a billionaire.

The origins of Facebook have been in dispute since the very week a 19-year-old. **Mark Zuckerberg** launched the site as a Harvard sophomore on February 4, 2004. Then called "thefacebook.com," the site was an instant hit.

In 2005, Zuckerberg's enterprise received a huge boost from the venture capital firm Accel Partners. Accel invested $12.7 million into the network, which at the time was open only to ivy league students. Zuckerberg's company then granted access to other colleges, high school and international schools, pushing the site's membership to more than 5.5 million users by December 2005. The site then began attracting the interest of other companies, who wanted to advertise with the popular social hub. Not wanting to sell out, Zuckerberg turned down offers from companies such as Yahoo! and MTV Networks. Instead, he focused on expanding the site, opening his project to outside developers and adding more features.

Yet Zuckerberg and Facebook continued to succeed, despite the criticism. *Time* magazine named him Person of the Year in 2010, and *Vanity Fair* placed him at the top of their New Establishment list. *Forbes*also ranked Zuckerberg at No. 35—beating out Apple CEO Steve Jobs—on its "400" list, estimating his net worth to be $6.9 billion.

Since amassing his sizeable fortune, Zuckerberg has used his millions to fund a variety of philanthropic causes. The most notable examples came in 2010. In September of that year, he donated $100 million to save the failing Newark Public Schools system in New Jersey. Then, in December 2010, Zuckerberg signed the "Giving Pledge", promising to donate at least 50 percent of his wealth to charity over the course of his lifetime. Other Giving Pledge members include Bill Gates, Warren Buffett and George Lucas. After his donation, Zuckerberg called on other young, wealthy entrepreneurs to follow suit. "With a generation of younger folks who have thrived on the success of their companies, there is a big opportunity for many of us to give back earlier in our lifetime and see the impact of our philanthropic efforts," he said.

Zuckerberg made two major life changes in May 2012. Facebook had its initial public offering, which raised $16 billion, making it the biggest internet IPO in history. How Zuckerberg's company will handle this influx of cash remains to be seen. But Zuckerberg may be looking at more acquisitions. He personally negotiated the company deal to buy Instagram the previous month.

After the initial success of the IPO, the Facebook stock price dropped somewhat in the early days of trading. But Zuckerberg is expected to weather any ups and downs in his company's market performance. He holds more than a quarter of its stock and retains 57 percent control of the voting shares.

This brilliant software developer has faced several lawsuits for rights to his revolutionary social networking website, including one from the site’s co-founder

On Dec 1, 2015, Mark Zuckerberg announced that he and his wife would give 99 percent of their Facebook shares “during our lives” to charitable purposes.

Advices from Mark Zuckerberg to entrepreneurs:

1-*By giving people the power to share, we're making the world more transparent.*

2-You get what you spend your time doing…

3-Get feedback…

4-*When you give everyone a voice and give people power, the system usually ends up in a really good place. So, what we view our role as, is giving people that power.*

5-Make mistakes…

6-Only hire people who you would work for…

7-Make a change in the world…

8-*I think a simple rule of business is, if you do the things that are easier first, then you can actually make a lot of progress.*

9-learn from the people around you…

10-Build a (really)good team…

11-*I think a simple rule of business is, if you do the things that are easier first, then you can actually make a lot of progress.*

12-Give the very best experience…

13-Care the most about it…

14-Social bonds are critical…

15-In a world that's changing really quickly, the only strategy that is guaranteed to fail is not taking risks.

006

Elizabeth Holmes

(The 'Youngest Self-Made Female Billionaire' Of the World)

Elizabeth Anne Holmes (born February 3, 1984) is an American entrepreneur and inventor. She is the founder and CEO of Theranos, a privately-held blood test company based in Palo Alto, California. In 2015, *Forbes* named Holmes as the youngest self-made female billionaire in the world due to a $9 billion valuation of Theranos. The next year Forbes revised her net value "From $4.5 Billion to Nothing". She was also named as *TIME's* "100 Most Influential People" of 2015. In 2016, after a series of journalistic and regulatory investigations that questioned the veracity of Theranos' claims, federal prosecutors began criminal investigations for potentially misleading investors and the government about the company's blood-testing technology. Following the revelation of potential fraud, *Fortune* named Holmes one of the "World's Most Disappointing Leaders". In 2016, the Centers for Medicare and Medicaid Services banned Holmes from owning, operating, or directing a diagnostic lab for a period of two years. That decision is under appeal.

Founding of Theranos:

Holmes founded the company in Palo Alto, California as Real-Time Cures to "democratize healthcare." Her goal was to make health information accessible to all people at any time so that risk of disease and health conditions could be detected early on.In April 2004, she incorporated the company as Theranos (an amalgam of "therapy" and "diagnosis") and rented the basement of a group college house. At that time, Holmes hired her first employee and rented lab space. Robertson became the company's first board member and introduced Holmes to venture capitalists.

Funding and expansion

By December 2004, she had raised $6 million to fund Theranos. The company's first revenue came from contracts Holmes established with pharmaceutical companies to conduct testing and other clinical trials. By the end of 2010, Holmes had more than $92 million in venture capital for Theranos. In July 2011, Holmes was introduced to former Secretary of State George Shultz. After a two-hour meeting, he joined the Theranos board of directors. She was recognized for forming "the most illustrious board in U.S. corporate history" over the next three years. Holmes operated Theranos in stealth mode without press releases or a company website until September 2013 when the company announced a partnership with Walgreens to make in-store blood sample collection centers.

Media attention increased in 2014 as she was on the cover of *Fortune*, *Forbes*, *T: The New York Times Style Magazine* and *Inc.*, who considered her "The Next Steve Jobs". *Forbes* recognized Holmes as the world's youngest self-made female billionaire and ranked her #110 on the Forbes 400 in 2014. Theranos was valued at $9 billion with more than $400 million in venture capital. By the end of 2014, she had 18 U.S. patents and 66 non-U.S. patents in her name.

During 2015, Holmes established agreements with Cleveland Clinic, Capital BlueCross and AmeriHealth Caritas to use Theranos technology.

Achievements

The last evolution in this regard took place in the 1960s, but Holmes discovered a unique way that had a potential to shake the whole industry. She remained an unknown personality virtually, until Forbes listed it in their list ’40 under 40’. Another reason believed to be behind this stealth approach is that she wanted to create a completely fresh market, before allowing her competitors to catch up. She gave up all the fun of this selfie age, breaking the internet, following YouTube stars and focused on her

business for a social cause. This is what made Elizabeth, the 'youngest self-made female billionaire' of the world.

Golden points of her life:

1-Find your why…

2-Focus on your mission…

3-Build people…

4-Believe…

5-Don't have a backup plan…

6-Embrace failure…

7-Suround yourself with SMART people…

8-Do not! do it for the money…

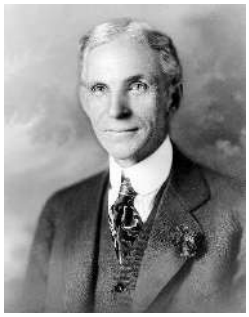
9-Weather the storm…

10-Make a difference…

007

Henry Ford

(Founder of Ford Motor Company, Entrepreneur)



Henry Ford (July 30, 1863 to April 7, 1947) was an American automobile manufacturer who created the Ford Model T car in 1908 and went on to develop the assembly line mode of production, which revolutionized the industry. As a result, Ford sold millions of cars and became a world-famous company head. The company lost its market dominance but had a lasting impact on other technological development and U.S. infrastructure. Today Henry Ford is credited for helping to build America's economy during the nation's vulnerable early years and is considered one of America's leading businessmen.

Early Life and Education:

When Henry Ford was 13 years old, his father gifted him a pocket watch, which the young boy promptly took apart and reassembled. Friends and neighbors were impressed, and requested that he fix their timepieces too.

Unsatisfied with farm work, Ford left home at the age of 16 to take an apprenticeship as a machinist at a shipbuilding firm in Detroit. In the years that followed, he would learn to skillfully operate and service steam engines and would also study bookkeeping.

In 1888, Henry Ford married Clara Ala Bryant. The couple had a son, Edsel, in 1893.

The Ford Motor Company:

After a few trials building cars and companies, Henry Ford established the Ford Motor Company in 1903.

Philosophy and Philanthropy

Henry Ford was an ardent pacifist and opposed World War I, even funding a peace ship to Europe. Later, in 1936, Ford and his family established the Ford Foundation to

provide ongoing grants for research, education and development.

In business, Ford offered profit sharing to select employees who stayed with the company for six months and, most important, who conducted their lives in a respectable manner. At the same time, the company's "Social Department" looked into an employee's drinking, gambling and otherwise uncouth activities to determine eligibility for participation.

Major works:

Henry Ford was the founder of the Ford Motor Company which revolutionized the automobile industry in the world. Under Ford's leadership, the company introduced methods for large-scale manufacturing of cars and large-scale management of an industrial workforce using specialized techniques. Today, it is the second-largest U.S.-based automaker.

Awards and achievements:

- Ford was awarded the Franklin Institute's Elliott Cresson Medal in 1928.
- In 1938, Ford was awarded Nazi Germany's Grand Cross of the German Eagle, a medal given to foreigners sympathetic to Nazism

Golden points from his life:

1-My best friend is the one who brings out the best in me…

2-Don't find fault, find a remedy…

3-Coming together is a beginning, keeping together is progress; working together is success…

4-If you think you can do a thing or think you can't do a thing; you are right…

5-A business that makes nothing but money is a poor business…

6-When everything seems to be going against you, remember that the airplane takes off against the wind, not with it…

7-Thinking is the hardest work there is, which is probably the why so few engage in it…

8-Quality means doing it right when no one is looking…

9-Even a mistake may turn out to be the one thing necessary to a worthwhile achievement…

10-Failure is simply the opportunity to begin again, this time more intelligently…

11-Obstacles are those frightful things you see when you take your eyes off your goal…

12-Nothing is particularly hard if you divide it into small jobs…

Sagheer Ahmed

008

Shahid Khan

(Owner of the Jacksonville Jaguars, Entrepreneur)

Shahid Khan (born July 18, 1950), also known as Shad Khan, is a Pakistani-American billionaire and business tycoon. He is the owner of the Jacksonville Jaguars of the National Football League (NFL), the English Football League Championship team Fulham F.C., and automobile parts manufacturer Flex-N-Gate in Urbana, Illinois.

Khan was featured on the front cover of *Forbes* magazine in 2012, associating him as the face of the American Dream. As of August 2017, Khan's net worth is over $8.7 billion. He is ranked 70th in the Forbes 400 list of richest Americans, and is overall the 158th wealthiest person in the world. He is the richest person of Pakistani origin.

Early life:

Khan was born in Lahore, Pakistan, to a middle-class family who were involved in the construction industry. His mother (now retired) was a professor of mathematics. He moved to the United States in 1967 at age 16 to study at the University of Illinois at Urbana-Champaign. When he came to the United States, he spent his first night in a $2/night room at the University Y-YMCA, and his first job was washing dishes for $1.20 an hour. He joined the Beta Theta Pifraternity at the school. He graduated from the UIUC College of Engineering with a BSc in Industrial Engineering in 1971. He later was awarded the Mechanical Science and Engineering Distinguished Alumni Award in 1999. Khan became a US citizen in 1991. He is Sunni Muslim.

Flex-N-Gate

Khan worked at the automotive manufacturing company Flex-N-Gate while attending the University of Illinois. When he graduated he was hired as the engineering director for the company. In 1978, he started Bumper Works, which made car bumpers for customized pickup trucks and body shop repairs The transaction involved a $50,000 loan from the Small Business Administration and $16,000 in his savings.

In 1980, he bought Flex-N-Gate from his former employer Charles Gleason Butzow, bringing Bumper Works into the fold. Khan grew the company so that it supplied bumpers for the Big Three automakers. In 1984, he began supplying a small number of bumpers for Toyota pickups. By 1987 it was the sole supplier for Toyota pickups and by 1989 it was the sole supplier for the entire Toyota line in the United States. Adopting The Toyota Way increased company efficiency and ability to change its manufacturing process within a few minutes. Since then the company has grown from $17 million in sales to an estimated $2 billion in 2010.

By 2011, Flex-N-Gate had 12,450 employees and 48 manufacturing plants in the United States and several other countries, and took in $3 billion in revenue.

In May 2012, the Occupational Safety and Health Administration fined Flex-N-Gate $57,000 for health violations at its Urbana plant.

Jacksonvile Jaguare

Khan's first attempt to purchase a National Football League team came on February 11, 2010, when he entered into an agreement to acquire 60% of the St. Louis Rams from Chip Rosenbloom and Lucia Rodriguez, subject to approval by other NFL owners. However, Stan Kroenke, the minority shareholder of the Rams, ultimately exercised a clause in his ownership agreement to match any proposed bid.

On November 29, 2011, Khan agreed to purchase the Jacksonville Jaguars from Wayne Weaver and his ownership group subject to NFL approval. Weaver

announced his sale of the team to Khan later that same day. The terms of the deal were not immediately disclosed, other than a verbal commitment to keep the team in Jacksonville, Florida. The sale was finalized on January 4, 2012. The purchase price for 100% share in the Jaguars was estimated to have been $760 million. The NFL owners unanimously approved the purchase on December 14, 2011. The sale made Khan the first member of an ethnic minority to own an NFL team. Khan is a board member of the NFL Foundation.

Folham. F.C

In July 2013, Khan negotiated the purchase of the London soccer club Fulham of the Premier League from its previous owner, Mohamed Al Fayed. The deal was finalized on July 12, 2013, with the amount estimated between £150-200 million. An official purchase price for the club was not announced with Khan stating that it was "highly confidential".

Recognition

Khan has received a number of awards from the University of Illinois, including a Distinguished Alumnus Award in 1999 from the Department of Mechanical Science and Industrial Engineering, the Alumni Award for Distinguished Service in 2006 from the College of Engineering, and (with his wife, Ann Carlson) the Distinguished Service Award in 2005 from the University of Illinois Alumni Association

Golden points of his life for entrepreneurs:

1-You take the situation and you make it better.

2-The most important thing is to really make a difference.

3- [In January 2009] We can’t become a nation of hamburger flippers and insurance salesmen. We’ve got to have manufacturing.

4- [On the eternal opportunities in America] You can do anything you want to. You must work hard, you must

create your own luck, and you must have some luck also. But here, it's possible.

5- [In December 2011] That's what luck is, right? When preparation meets opportunity.

6-You must learn and change, no matter how successful you are.

7-You've got to find the best people.

8-You must find, and attract and keep good people.

9- [On not being put off by the challenge that Jacksonville Jaguars presented when he bought it to become viable.] No, I've been around opportunity or turnaround all my life.

10- [In February 2012] I think listening to the customer, having a sense of humility. That's huge.

11-The wonderful thing about America is optimism. You know the American Dream. That is something so precious.

12- [In December 2011] We are always growing. We are always looking. I want to see what the opportunities are.

13-You must take your lumps and face reality. There's always some good in something bad happening to you, and you look for that.

14- [On what led him to America from Pakistan.] Looking for a better life, fame and fortune. Heard the streets were paved with gold. Found that to be true.

15-I got encouragement from my father. That he had always dreamt of going overseas to make his fortune. He'd had some success as a small-time entrepreneur. I should do it. And I thought that was great.

16-I wanted to study engineering. We researched and applied to a couple of schools. The first letter that came was from the University of Illinois and admitted. So, there I went.

Sagheer Ahmed

17-Physically you give up very little when you give up material possessions. It thinks it’s when you give of yourself that you truly give.

18- [On philanthropy] It’s about sustainability and really making a difference for the long haul. I think it’s something you must spend a lot of time and thought on.

19-We have a couple of kids, we’re lucky to have them.

20- [On his style of philanthropy.] We wanted to be more about making a difference teaching people to fish rather than giving them a fish.

21-I think charity begins at home.

22-It’s great to learn, but it’s even better to learn from someone else – their experience.

Sagheer Ahmed

009

Steve Jobs

(Pioneer of Personal Computer)

Steven Paul Jobs (February 24, 1955 – October 5, 2011) was an American entrepreneur, businessman, inventor, and industrial designer. Jobs was the chairman, and the chief executive officer (CEO), and a co-founder of Apple Inc.; CEO and majority shareholder of Pixar; a member of The Walt Disney Company's board of directors following its acquisition of Pixar; and founder, chairman, and CEO of NeXT. Jobs and Apple co-founder Steve Wozniak are widely recognized as pioneers of the microcomputer revolution of the 1970s and 1980s.

Apple Computer

After high school, Jobs enrolled at Reed College in Portland, Oregon. Lacking direction, he dropped out of college after six months and spent the next 18 months dropping in on creative classes at the school. Jobs later recounted how one course in calligraphy developed his love of typography.

In 1974, Jobs took a position as a video game designer with Atari. Several months later he left the company to find spiritual enlightenment in India, traveling further and experimenting with psychedelic drugs. In 1976, when Jobs was just 21, he and Wozniak started Apple Computer. The duo started in the Jobs family garage, funding their entrepreneurial venture by Jobs selling his Volkswagen bus and Wozniak selling his beloved scientific calculator.

Jobs and Wozniak are credited with revolutionizing the computer industry by democratizing the technology and

making machines smaller, cheaper, intuitive and accessible to everyday consumers. Wozniak conceived of a series of user-friendly personal computers, and—with Jobs in charge of marketing—Apple initially marketed the computers for $666.66 each. The Apple I earned the corporation around $774,000. Three years after the release of Apple's second model, the Apple II, the company's sales increased by 700 percent to $139 million. In 1980, Apple Computer became a publicly traded company, with a market value of $1.2 billion by the end of its very first day of trading. Jobs looked to marketing expert John Sculley of Pepsi-Cola to take over the role of CEO for Apple.

Departure from Company

However, the next several products from Apple suffered significant design flaws, resulting in recalls and consumer disappointment. IBM suddenly surpassed Apple in sales, and Apple had to compete with an IBM/PC-dominated business world. In 1984, Apple released the Macintosh, marketing the computer as a piece of a counterculture lifestyle: romantic, youthful, creative. But despite positive sales and performance superior to IBM's PCs, the Macintosh was still not IBM-compatible. Sculley believed Jobs was hurting Apple, and the company's executives began to faze him out.

Not actually having had an official title with the company he co-founded, Jobs was pushed into a more marginalized position and thus left Apple in 1985 to begin a new hardware and software enterprise called NeXT, Inc. The following year Jobs purchased an animation company from George Lucas, which later became Pixar Animation Studios. Believing in Pixar's potential, Jobs initially invested $50 million of his own money in the company. The studio went on to produce wildly popular movies such as *Toy Story*, *Finding Nemo* and *The Incredibles;* Pixar's films have collectively netted $4 billion. The studio merged with Walt Disney in 2006, making Steve Jobs Disney's largest shareholder.

Reinventing Apple

Despite Pixar's success, NeXT, Inc. floundered in its attempts to sell its specialized operating system to mainstream America. Apple eventually bought the company in 1996 for $429 million. The following year, Jobs returned to his post as Apple's CEO.

Just as Steve Jobs instigated Apple's success in the 1970s, he is credited with revitalizing the company in the 1990s. With a new management team, altered stock options and a self-imposed annual salary of $1 a year, Jobs put Apple back on track. His ingenious products (like the iMac), effective branding campaigns and stylish designs caught the attention of consumers once again.

Pancreatic Cancer

In 2003, Jobs discovered that he had a neuroendocrine tumor, a rare but operable form of pancreatic cancer. Instead of immediately opting for surgery, Jobs chose to alter his pesco-vegetarian diet while weighing Eastern treatment options. For nine months, Jobs postponed surgery, making Apple's board of directors nervous. Executives feared that shareholders would pull their stock if word got out that their CEO was ill. But in the end, Jobs' confidentiality took precedence over shareholder disclosure. In 2004, he had a successful surgery to remove the pancreatic tumor. True to form, in subsequent years Jobs disclosed little about his health.

Golden points from his life for entrepreneurs:

1-Don’t live a limited life…

2-Have passion…

3-Design for yourself…

4-Don’t sell crap…

Sagheer Ahmed

5-Build a great team…

6-Don’t do it for money…

7-Be proud of your products…

8-Build around customers…

9-Marketing is about values…

10-Stay hungry, stay foolish…

11-My favorite things in life don’t cost any money, it’s (really) clear that the most precious resource we all have is time…

12-Some time when you innovate, you make mistakes, it is the best admit them quickly and get on with improving your other innovations…

13-Quality is more important than quantity, one home run is much better than two doubles…

14- The people who are crazy enough to think they can change the world are the ones who do…

15-Sometime life hits you in the head with the brick, don’t lose faith…

Sagheer Ahmed

010

Walt Disney

(Animator, voice actor, film producer, Entrepreneur)

Walter Elias Disney (December 5, 1901 – December 15, 1966) was an American entrepreneur, animator, voice actor and film producer. A pioneer of the American animation industry, he introduced several developments in the production of cartoons. As a film producer, Disney holds the record for most Academy Awards earned by an individual, having won 22 Oscars from 59 nominations. He was presented with two Golden Globe Special Achievement Awards and an Emmy Award, among other honors. Several of his films are included in the National Film Registry by the Library of Congress.

Walt Disney's First Cartoons

In 1919, Disney moved to Kansas City to pursue a career as a newspaper artist. His brother Roy got him a job at the Pesmen-Rubin Art Studio, where he met cartoonist Ubbe Eert Iwwerks, better known as Ub Iwerks. From there, Disney worked at the Kansas City Film Ad Company, where he made commercials based on cutout animation. Around this time, Disney began experimenting with a camera, doing hand-drawn cel animation, and decided to open his own animation business. From the ad company, he recruited Fred Harman as his first employee.

Walt and Harman made a deal with a local Kansas City theater to screen their cartoons, which they called *Laugh-O-Grams*. The cartoons were hugely popular, and Disney could acquire his own studio, upon which he bestowed the same name. Laugh-O-Gram hired many employees, including Harman's brother Hugh and

Iwerks. They did a series of seven-minute fairy tales that combined both live action and animation, which they called *Alice in Cartoonland*. By 1923, however, the studio had become burdened with debt, and Disney was forced to declare bankruptcy.

Roy Disney and Disney Brothers' Studio
Disney and his brother Roy soon pooled their money and moved to Hollywood. Iwerks also relocated to California, and there the three began the Disney Brothers' Studio. Their first deal was with New York distributor Margaret Winkler, to distribute their *Alice* cartoons. They also invented a character called Oswald the Lucky Rabbit, and contracted the shorts at $1,500 each.

Walt Disney's Mickey Mouse
A few years later, Disney discovered that Winkler and her husband, Charles Mintz, had stolen the rights to Oswald, along with all of Disney's animators, except for Iwerks. Right away the Disney brothers, their wives and Iwerks produced three cartoons featuring a new character Walt had been developing called Mickey Mouse. The first animated shorts featuring Mickey were *Plane Crazy* and *The Gallopin' Gaucho*, both silent films for which they failed to find distribution. When sound made its way into film, Disney created a third, sound-and-music-equipped short called *Steamboat Willie*. With Walt as the voice of Mickey, the cartoon was an instant sensation.

Walt Disney's Films Find Commercial Success
In 1929, Disney created *Silly Symphonies*, which featured Mickey's newly created friends, including Minnie Mouse, Donald Duck, Goofy and Pluto. One of the most popular cartoons, *Flowers and Trees*, was the first to be produced in color and to win an Oscar. In 1933, *The Three Little Pigs* and its title song "Who's Afraid of the Big Bad Wolf?" became a theme for the country during the Great Depression.

On December 21, 1937, *Snow White and the Seven Dwarfs*, the first full-length animated film, premiered in Los Angeles. It produced an unimaginable $1.499 million, despite the Depression, and won a total of eight Oscars. During the next five years, Walt Disney Studios completed another string of full-length animated films, *Pinocchio* (1940), *Fantasia* (1940), *Dumbo* (1941) and *Bambi* (1942).

In December 1939, a new campus for Walt Disney Studios was opened in Burbank. A setback for the company occurred in 1941, however, when there was a strike by Disney animators. Many of them resigned, and it would be years before the company fully recovered. During the mid-1940s, Disney created "packaged features," groups of shorts strung together to run at feature length, but by 1950, he was once again focusing on animated features. *Cinderella* was released in 1950, followed by a live-action film called Treasure Island (1950), Alice in Wonderland (1951), Peter Pan (1953), Lady and the Tramp (1955), Sleeping Beauty (1959) and 101 Dalmatians (1961). In all, more than 100 features were produced by his studio.

Disney was also among the first to use television as an entertainment medium. The Zorro and Davy Crockett series were extremely popular with children, as was The Mickey Mouse Club, a variety show featuring a cast of teenagers known as the Mouseketeers. Walt Disney's Wonderful World of Color was a popular Sunday night show, which Disney used to begin promoting his new theme park. Disney's last major success that he produced himself was the motion picture Mary Poppins (1964), which mixed live action and animation.

Disneyland's Opening

Disney's $17 million Disneyland theme park opened on July 17, 1955, in Anaheim, California, with actor (and future U.S. president) Ronald Reagan presiding over the activities on what was once an orange grove. After a tumultuous opening day involving several mishaps (including the distribution of thousands of counterfeit

invitations), the site became known as a place where children and their families could explore, enjoy rides and meet the Disney characters.

In a very short time, the park had increased its investment tenfold, and was entertaining tourists from around the world. With the original site having some attendance ups and downs over the years, Disneyland has expanded its rides over time and branched out globally with parks in Tokyo, Paris and Hong Kong, with a Shanghai location that opened in June 2016. Sister property California Adventure also opened in 2001.

Awards:

26 Academy Awards (22 competitive, 4 honorary)

3 Golden Globe Awards

1 Emmy Award

Suggestions from Walt Disney:

1-The flower that blooms in adversity is the rarest and most beautiful of all.

2-All our dreams can come true, if we have the courage to pursue them.

3-The way to get started is to quit talking and begin doing.

4-There is more treasure in books than in all the pirates' loot on Treasure Island and best of all, you can enjoy these riches every day of your life.

Sagheer Ahmed

5-If you can dream it, you can do it. Always remember that this whole thing was started with a dream and a mouse.

6-The more you like yourself, the less you are like anyone else, which makes you unique.

7-The past can hurt. But the way I see it, you can either run from it, or learn from it.

8-When you're curious, you find lots of interesting things to do.

9-Think, Believe, Dream, and Dare.

10-Our greatest national resource is the minds of our children.

11-Those who are clever, who have a brain, never understand anything.

12-I do not like to repeat successes I like to go on to other things.

13-Why worry? If you've done the very best you can, worrying won't make it any better

Sagheer Ahmed

011

Nick Vivjick

(Father of Motivational Speaker, Entrepreneur)

Nick Vujicic was born to Dushka and Boris Vujicic in 1982 in Melbourne, Australia. Although he was an otherwise healthy baby, Nick was born without arms and legs; he had no legs, but two small feet, one of which had two toes(tetra-amelia syndrome). He is one of the seven known surviving individuals' planet-wide who live with the syndrome.

Early life:

Nick Vujicic was born in Melbourne, Australia, in 1982 to Dušanka and Borislav Vujičić, Serbian immigrants from Yugoslavia.

His parents became active in a Melbourne church. His mother attended nursing school at the Royal Children's Hospital in Melbourne while his father worked in business management. He was born with tetra-amelia without some fully formed limbs. According to his autobiography, his mother refused to see him or hold him while the nurse held him in front of her, but she and her husband eventually accepted their son's condition and understood it as "God's plan for their son".

Vujicic has two small and deformed feet, one of which he calls his "chicken drumstick" because of its shape.

Originally, he was born with the toes of that foot fused. An operation was performed to separate the toes so that he could use them as fingers to grab, turn a page, or perform other functions. He has been able to use his foot to operate an electric wheelchair, a computer and a mobile phone. Vujicic attempted suicide but notes that he had an "amazingly normal childhood".

Vujicic thrived in his teenage and young adult years despite being bullied. After his mother showed him a newspaper article about a man dealing with a severe disability when he was seventeen, he started to give talks at his prayer group. Vujicic graduated from Griffith University at the age of 21 with a Bachelor of Commerce degree, with a double major in accountancy and financial planning.

Career:

- When Nick, as he is known, turned seventeen, he started delivering speeches in his church group. He earned a Bachelor's degree in Commerce, specializing in financial planning and accountancy, from the 'Griffith University' in Queensland.
- As a speaker, he mainly addresses school children, young adults, and working professionals. He has also spoken at various churches, across the globe, because he believes that Christ loves him as He loves all his children.
- In his career, Nick has travelled to more than sixty countries around the world, and has touched the lives of millions of people. In 2005, he established an NGO named 'Life Without Limbs', which has its headquarters in Agoura Hills, California.
- In the same year, Vujicic released the DVD of a documentary movie, titled 'Life's Greater Purpose'. The film talks about the motivational speaker's childhood, how he learned to use whatever was there of his limbs, and his married life.
- In March 2008, Nick appeared in the '20/20' television series aired in the United States, for an interview, taken by presenter Bob Cummings.
- In 2009, Vujicic featured in a short film titled 'The Butterfly Circus', directed by Joshua

Weigel. It also starred Mexican actor, Eduardo Verástegui, and American Doug Jones.

- The movie won a lot of accolades, including the first prize awarded by the 'Doorpost Film Project', and the 'Best Short Film' at the 'Method Fest Independent Film Festival', as well as the 'The Feel-Good Film Festival'.
- In 2010, Nick wrote a book, 'Life Without Limits: Inspiration for a Ridiculously Good Life', under the banner of publishing company, 'Random House'. He also released a DVD titled 'Biography of a Determined Man of Faith'.
- Vujicic gave a heart-rending speech in Switzerland, at the 'World Economic Forum', for their Annual Meeting's special session, 'Inspired for a Lifetime', in 2011.

Major works:

Nick is an evangelist who is known for his organization, 'Life Without Limbs', that hosts events and presents talks on courage and faith in God to overcome any adversity faced in life.

Awards and achievements:

- In 1990, Vujicic's determination and courage impressed the world, and he was felicitated with the 'Australian Young Citizen Award'.
- He was one of the contenders for the 'Young Australian of the Year Award' in the year 2005.
- In 2010, he won the 'Best Actor in Short Film' award at the 'Method Fest Independent Film Festival' for his performance in the role of Will, from the movie 'The Butterfly Circus'.

Net Worth:

Nick, who runs an NGO, 'Life Without Limbs', aimed at helping people overcome challenges in their lives, has an estimated net worth of 500,000 dollars.

Golden points from his life for entrepreneurs:

1-You are valuable…

2-Believe in yourself…

3-Don’t give up…

4-Just do it…

5-Go one step at a time…

6-Find your purpose…

7-Make today count…

8-Have faith…

9-Perserve…

10-Be thankful for what you have…

11-If you can't get a miracle, become one. ...

12-Life isn't about having, it's about being. ...

13-I never met a bitter person who was thankful. Or a thankful person who was bitter.

14-If I fail, I try again, and again, and again…

15-You can't even stand without risking to falling…

012

Larry Page

(Co-founder of Google, computer scientist, Entrepreneur)

Lawrence Edward Page (born March 26, 1973) is an American computer scientist and Internet entrepreneur who co-founded Google with Sergey Brin. Page is the chief executive officer (CEO) of Google's parent company, Alphabet Inc. After stepping aside as Google CEO in August 2001 in favor of Eric Schmidt, he re-assumed the role in April 2011. He announced his intention to step aside a second time in July 2015 to become CEO of Alphabet, under which Google's assets would be reorganized. Under Page, Alphabet is seeking to deliver major advancements in a variety of industries.

As of March 2017, Page is the 12th richest person in the world, with an estimated net worth of US$40.7 billion

Google Begins

As a research project at Stanford University, Page and Brin created a search engine that listed results according to the popularity of the pages, after concluding that the most popular result would often be the most useful. They called the search engine "Google" after the mathematical term "googol," which refers to the No. 1 followed by 100 zeros, to reflect their mission to organize the immense amount of information available on the web.

After raising $1 million from family, friends and other investors, the pair launched the company in 1998. Google has since become the world's most popular search engine, receiving an average of 5.9 billion searches per day in 2013. Headquartered in the heart of California's Silicon Valley, Google held its initial

public offering in August 2004, making Page and Brin billionaires.

Evolving Conglomerate

In 2006, Google purchased the most popular website for user-submitted streaming videos, YouTube, for $1.65 billion in stock.

In September 2013, Page was ranked No. 13 on the "Forbes 400" list of the richest people in America. That October, he was ranked No. 17 on *Forbes*' 2013 "Most Powerful People" list. As Google's CEO, Page shared responsibility for the company's day-to-day operations with Brin, who served as director of special projects for Google, and Eric Schmidt, the company's executive chairman.

On August 10, 2015, Page and Brin announced the creation of a new parent company called Alphabet to oversee Google and other subsidiaries. Page and Brin were set to serve as the new company's CEO and president, respectively, with Sundar Pichai stepping in as Google's top executive.

Major Works:

- Larry Page's biggest work is the formation of Google. Google, founded in 1998, is world's leading search engine, serving millions of users worldwide. Besides search, Google offers many other products and services like Gmail, Blogger, Google Maps, Picasa etc.
- The charitable arm of the company, Google.org, was formed in 2004. The organization is dedicated to finding technological solutions to help address global challenges like hunger and poverty.

Awards and Achievements:

- In 2002, Page and Brin were named in the MIT Technology Review TR100 for being among the top

100 innovators in the world under the age of 35.

- The World Economic Forum named Page as a Global Leader for Tomorrow in 2002.
- Page and Brin received the prestigious Marconi Foundation Prize (2004) which is given to honor significant contributions in science and technology. They were also elected Fellow of the Marconi Foundation at Columbia University.

Golden points of his life for entrepreneurs:

1-Set big goals…

2-Don't be afraid of failure…

3-Concentrate on the long term…

4-Have a good idea…

5-Solve bigger problem…

6-Take on challenges…

7- Don't settles…

8-Adapt to change…

9-Stay organize…

10-Follow your dreams…

11-You never lose a dream. It just incubates as a hobby…

12-Always deliver more than expected…

13-If you're not some things that are crazy, then you're doing the wrong things…

14-Basically, our goal is to organize the world's information and to make it universally accessible and useful…

15-We should be building great things that don't exist…

013

Sara Blakely

(Founder And Owner Of Spanx Minority Owner Of The Atlanta Hawks)

Sara Blakely (born February 27, 1971) is an American billionaire businesswoman, and founder of Spanx, an American intimate apparel company with pants and leggings, founded in Atlanta, Georgia. In 2012, Blakely was named in *Time*magazine's "Time 100" annual list of the 100 most influential people in the world. As of 2014, she is listed as the 93rd most powerful woman in the world by *Forbes*

Early Life

Born on February 27, 1971, Sara Blakely is the creator and founder of Spanx, a hugely successful line of shapewear. She grew up in Clearwater, Florida, with her younger brother, Ford. Their father worked as a lawyer and their mother was an artist. Blakely later credited her father with helping her develop the courage to be an entrepreneur. As she told *Newsweek*, "My father encouraged my brother and me to fail. I specifically remember coming home and saying, 'Dad, Dad, I tried out for this or that and I was horrible,' and he would high-five me and say, 'Way to go.'"

Blakely attended Florida State University, graduating in 1993 with a degree in communication studies. She dreamed of being a lawyer like her father, but she twice scored too low on her LSAT exams to make it into law school. For a time, Blakely ended up working at Walt Disney World. She later became a fax machine salesperson.

In 1998, while working in sales, Blakely came up with a new business idea. She had a pair of white trousers, but she couldn't find any undergarment she liked to wear under them. As she explained to *Forbes*, Blakely created her own solution. "I cut the feet off a pair of panty hose and it allowed me to wear a pair of great

strappy sandals. I didn't see lines but the hose rolled up at my feet."

Inventor of Spanx

Blakely realized her footless take on panty hose could be a brilliant product. She spent two years working on her new business venture, working out the final design and registering her patent for this new type of shapewear. Blakely also had to convince a manufacturing firm to produce the product she named Spanx. In the beginning, as she told the *Daily Mail*, "I had no money to advertise, so I went out on the road and stood in department stores for nine hours a day, lifting my trouser leg to show customers my tights, and holding up pictures of my own bottom, in my white trousers, with and without my product on."

Spanx soon proved to be a hit. Blakely landed her first major department store order with Neiman Marcus and appeared on Oprah Winfrey's "favorite things" list in her first year. Over the years, she expanded her product line to include panties, bras and another shapewear. Blakely also developed quite the celebrity following as such stars as Gwyneth Paltrowpublicly raved about her products.

In March 2012, Blakely made the cover of *Forbes* magazine as the world's youngest self-made female billionaire. She debuted her special shapewear line for Target, called Assets, that same year. Blakely has continued to grow her business, branching into the jeans market in 2015.

In addition to her shapewear empire, she is a noted philanthropist. She established the Sara Blakely Foundation in 2006, which "is dedicated to helping women globally and locally through education and entrepreneurship," according to the Spanx website. Blakely also donated $1 million to the Oprah Winfrey Leadership Academy Foundation in South Africa in 2007.

Golden points of her life for entrepreneurs:

1-Trust your gut…

2-Don't be intimidated by what you don't know. That can be your greatest strength and ensure that you do things differently from everyone else.

3-Differciate yourself…

4-We don't have the luxury of time. We spend more because of how we live, but it's important to be with our family and friends

5-Embarace failure…

6-Visualize…

7-Everything in our society is so purposeful.

8-Be honest…

9-Embarace not knowing…

10-I took a Fear of Flying class, and I always missed the class, because I was always flying.

11-Write down your goals…

12-Hire your weakness…

13-My revenue was $4 million my first year in business, off of one $20 item.

14-Think outside of the box…

15-Think big…

014

Steve Wozniak

(Electronic engineer, Programmer, Entrepreneur)

Stephen Gary "Steve" Wozniak (born Stephan Gary Wozniak on August 11, 1950), also nicknamed "The Woz", is an American inventor, electronics engineer, programmer, philanthropist, and technology entrepreneur who co-founded Apple Inc. He is known as a pioneer of the personal computer revolution of the 1970s and 1980s, along with Apple co-founder Steve Jobs.

Wozniak single-handedly developed the 1976 Apple I, which was the computer that launched Apple. He primarily designed the 1977 Apple II, known as one of the first highly successful mass-produced microcomputers while Jobs oversaw the development of its unusual case and Rod Holt developed the unique power supply.

Early age:

- Steve Wozniak was born as Stephen Gary Wozniak in San Jose, California, to Margaret Elaine (Kern) and Jacob Francis "Jerry" Wozniak. He belongs to a mixed Polish, German, Irish and English ancestry.
- Growing up in a booming technological center did more good than harm to this technically-inclined kid who since young, found his true calling in electronics. As a kid, he indulged in making homemade devices like voltmeter, ham radio, calculator and games.
- Despite being extremely bright and intelligent, routine schooling and rote learning bored him. Flunking from the University of Colorado, he gained admission at the University of California.

Professional path:

- It was through a common friend that in 1971, he met Steve Jobs, who like him, hated school and shared a passion and obsession for electronics. He shared a great bond with Jobs, as both were fueled by the same passion.
- The duo became friends while working together on a mainframe computer at Hewlett-Packard (HP). It was around this time Wozniak dropped out of the University of California.
- Meanwhile, the world of electronics witnessed an upsurge as the demand for personal computers started ticking off. Much of it was due to the development of microprocessor.
- Since he could not afford a computer on his own, he decided to build one. What eventually followed was the first generation of Apple computer, titled Apple I. Interestingly; he designed the hardware, circuit board designs, and operating system singlehandedly.
- Performance wise, the computer built by Wozniak could perform greater operations than the Altair present in the market. In the history of computing, Apple I became the first home computer to display a character on a TV screen.
- He along with Jobs introduced the Apple I computer to the Palo Alto-based Homebrew Computer Club, which essentially comprised of electronics hobbyists interested in computing
- Jobs took the charge of marketing the device while Wozniak looked to further improve and augment it. What made Apple I computer far superior from the market counterparts was the fact that it had an easy-to-achieve video capability that others lacked.
- They sold some of their personal possessions and the duo started selling fully assembled printed circuit boards. No sooner they marketed and sold monitors, electronic devices, and computer games. It was through this that they raised USD $1,300.

- On April 1, 1976, he together with Jobs founded Apple Computers. Meanwhile, he resigned from his duty from Hewlett Packard and took up the profile of the Vice President at Apple. He oversaw the research and development wing.
- Unlike Altair 8800, Apple I computer was essentially for entertainment purpose. It did not have provision for expansion card and thus unlike Altair 8800, could not be attached to a computer terminal and be programmed in BASIC.
- After the success of the Apple I computer, he designed the second generation of Apple computers titled Apple II. Much unlike its predecessor, the Apple II computer had the ability to display computer graphics and had built-in BASIC programming language. Furthermore, it had 8 expansion slots.
- The Apple II computer went on to become one of the first highly successful mass-produced personal computers.
- With time, the popularity of Apple started soaring sky high. Its expansion was inevitable and so was the inclusion of other engineers. In 1980 the company went public with its stock value standing at US $ 117 million.
- In 1981, he narrowly escaped death as he met with an unfortunate accident as he was piloting a plane on a runway which crashed. It took him two years to fully recover from the incident. It was during this time that he sponsored two US Festivals to celebrate evolving technologies
- When he resumed his duties at Apple, he took up from where he left as the engineer and motivational factor for Apple workforce. The company had expanded greatly and its stock value reached US $ 985 million.
- His full-time employment with Apple duly ended when he retired from the company on February 6, 1987. Nevertheless, till date, he remains as an employee of Apple and receives a stipend,

estimated to be USD$120,000 per year. He is also an Apple shareholder.

- After his retirement from Apple, he founded a new venture called CL 9. The company brought to the market the first-ever programmable universal remote control.
- Ever since long, he wanted to take up a teaching position at an elementary school because of the important role that teachers play in student's lives. It was post retiring from Apple that he realized his dream by teaching computer to students from the fifth to ninth grade.
- In 2001, he founded WOZ or Wheels of Zeus to create wireless GPS to help people find everyday things easily and without any hassle.
- In 2002, he joined the Board of Directors of Ripcord Networks Inc and Danger Inc.
- WOZ terminated its operation in 2006. Following this, he, along with Ellen Hancock and Gil Amelio founded Acquicor Technology, a holding company for acquiring technology companies and developing them.
- From being an engineer, he tried his hand at writing and turned to be an author, with his first publication, an autobiography titled 'iWoz: From Computer Geek to Cult Icon: How I Invented the Personal Computer, Co-Founded Apple, and Had Fun Doing It'. The book was co-authored by writer Gina Smith
- In 2009, he was employed by Fusion-io, a data storage and server company, in Salt Lake City, Utah, as their chief scientist. Two years later, he was a part of the management team of the company top celebrate the first day of trading on the NYSE by ringing The Opening Bell.
- In 2011, he was a keynote speaker at important events namely IP EXPO which took place at Earls Court Exhibition Centre in London and Rutgers University in New Brunswick, New Jersey.

Philanthropy:

In 1990, Wozniak helped found the Electronic Frontier Foundation, providing some of the organization's initial funding and serving on its founding Board of Directors. Also since leaving Apple, Wozniak has provided all the money, as well as a good amount of on-site technical support, for the technology program in his local school district. Un.U.Son. (Unite Us in Song), an organization Wozniak formed to organize the two US festivals, is now primarily tasked with supporting his educational and philanthropic projects. In 1986, Wozniak lent his name to the Stephen G. Wozniak Achievement Awards (popularly known as "Wozzie Awards"), which he presented to six Bay Area high school and college students for their innovative use of computers in the fields of business, art and music. More recently, Wozniak was the subject of a student-made film production of his friend's (Joe Patane) nonprofit Dream Camp Foundation for high-level need youth titled *Camp Woz: The Admirable Lunacy of Philanthropy*.

Awards and achievements:

Wozniak was awarded the National Medal of Technology by the President of the United States in 1985, the highest honor bestowed on America's leading innovators. In 2000, he was inducted into the Inventors Hall of Fame and was awarded the prestigious Heinz Award for Technology, The Economy and Employment for "single-handedly designing the first personal computer and for then redirecting his lifelong passion for mathematics and electronics toward lighting the fires of excitement for education in grade school students and their teachers."

Golden points of his life for entrepreneur:

1-Strive for perfection…

2-Build things for yourself…

3-Be a good friend…

4-Better the world in some way…

5-Take it one step further…

6-Just believe and be nice to people…

7-Think for yourself…

8-Create a working product…

9-Acceptance is key…

10-Live a happy life…

11-Computers were going to belong to everyone, and give us power, and free us from the people who owned computers and all that stuff…

12-Creative things must sell to get acknowledged as such…

13-My goal wasn't to make a ton of money. It was to build good computers….

14-Wherever smart people work; doors are unlocked….

15-Artists work best alone. Work alone…

015

Richard Branson

(Businessman, Entrepreneur)

Richard Branson is an entrepreneur and businessman, who founded the Virgin group of more than 400 companies. The Virgin group grew from a small record shop he founded in 1972, to become a major multinational company including interests in transport, media, and entertainment. Richard Branson is also a flamboyant character and has taken part in many grueling adventure challenges, such as sailing across the Atlantic and taking part in round the world hot air balloon journeys.

Early Life

Richard Charles Nicholas Branson was born on July 18, 1950, in Surrey, England. His father, Edward James Branson, worked as a barrister. His mother, Eve Branson, was employed as a flight attendant. Richard, who struggled with dyslexia, had a hard time with educational institutions. He nearly failed out of the all-boys Scaitcliffe School, which he attended until the age of 13. He then transferred to Stowe School, a boarding school in Stowe, Buckinghamshire, England.

Still struggling, Branson dropped out at the age of 16 to start a youth-culture magazine called *Student*. The publication, run by students, for students, sold $8,000 worth of advertising in its first edition, which was launched in 1966. The first run of 50,000 copies was disseminated for free, after Branson covered the costs with advertising.

By 1969, Branson was living in a London commune, surrounded by the British music and drug scene. It was during this time that Branson had the idea to begin a

mail-order record company called Virgin to help fund his magazine efforts. The company performed modestly, but made Branson enough that he could expand his business venture, adding a record shop in Oxford Street, London. With the success of the record shop, the high school drop-out could build a recording studio in 1972 in Oxfordshire, England.

Virgin Records

His first artist on the Virgin Records label, Mike Oldfield, recorded his single "Tubular Bells" in 1973 with the help of Branson's team. The song was an instant smash, staying on the UK charts for 247 weeks. Using the momentum of Oldfield's success, Branson then signed other aspiring musical groups to label, including the Sex Pistols. Artists such as the Culture Club, the Rolling Stones, and Genesis would follow, helping to make Virgin Music one of the top six record companies in the world.

Business Expansion

Branson expanded his entrepreneurial efforts yet again, this time to include the travel company the Voyager Group in 1980, the airline Virgin Atlantic in 1984, and a series of Virgin Megastores. But Branson's success was not always predictable. By 1992, Virgin was suddenly struggling to stay financially afloat. The company was sold later that year to THORN EMI for $1 billion.

Branson was crushed by the loss, reportedly crying after the contract was signed, but remained determined to stay in the music business. In 1993, he founded the station Virgin Radio, and several years later he started a second record company, V2. Founded in 1996, V2 now includes artists such as Powder Finger and Tom Jones.

Branson's Virgin Group now holds more than 200 companies in more than 30 countries, including the United Kingdom, the United States, Australia, Canada, Asia, Europe and South Africa. He has expanded his

Sagheer Ahmed

businesses to include a train company, a luxury game preserve, a mobile phone company and a space-tourism company, Virgin Galactic.

Branson is also known for his sporting achievements, notably the record-breaking Atlantic crossing in Virgin Atlantic Challenger II in 1986, and the first crossing by hot-air balloon of the Atlantic (1987) and Pacific (1991). He was knighted in 1999 for his contribution to entrepreneurship, and in 2009, he landed at No. 261 on *Forbes*' "World Billionaires" list with his $2.5 billion in self-made fortune, which includes two private islands.

Virgin Galactic

In recent years, the ever-adventurous Branson has focused much of his attention on his space tourism venture. He partnered with Scaled Composites to form The Spaceship Company, which is currently developing a suborbital spaceplane, and, in April 2013, the project made an impressive leap forward with the test launch of *SpaceShipTwo*.

Branson was delighted by the success of his spaceship's first test, telling NBC News that "We're absolutely delighted that it broke the sound barrier on its very first flight, and that everything went so smoothly." He expects to be finishing testing the craft by the end of 2013. By April 2013, more than 500 people had bought their tickets for Virgin Galactic's voyages.

Golden points from his life:

1-keep it simple…

2-Give it a try…

3-Be a leader…4-Don’t give up…

5-Delegate…

6-Treat people well…

Sagheer Ahmed

7-Shake things up…

8-People will be skeptical…

9-Affect lives positively…

10-Do things differently…

11-You don't learn to walk by following rules. You learn by doing, and by falling over...

12-Business opportunities are like buses, there’s always another one coming...

13-Do not be embarrassed by your failures, learn from them and start again...

14-One thing is certain in business. You and everyone around you will make mistakes...

15-My definition of success? The more you’re actively and practically engaged, the more successful you will feel…

Sagheer

016
Charlie Chaplin

(Actor, Director, Composer, Screenwriter, Producer, Editor, Entrepreneur)

Sir Charles Spencer "Charlie" Chaplin, KBE (16 April 1889 – 25 December 1977) was an English comic actor, filmmaker, and composer who rose to fame in the era of silent film. Chaplin became a worldwide icon through his screen persona "the Tramp" and is considered one of the most important figures in the history of the film industry. His career spanned more than 75 years, from childhood in the Victorian era until a year before his death in 1977, and encompassed both adulation and controversy.

Early Life

Famous for his character "The Tramp," the sweet little man with a bowler hat, mustache and cane, Charlie Chaplin was an iconic figure of the silent-film era and one of film's first superstars, elevating the industry in a way few could have ever imagined.

Born Charles Spencer Chaplin in London, England, on April 16, 1889, Charlie Chaplin's rise to fame is a true rags-to-riches story. His father, a notorious drinker, abandoned Chaplin, his mother and his older half-brother, Sydney, not long after Chaplin's birth. That left Chaplin and his brother in the hands of their mother, a vaudevillian and music hall singer who went by the stage name Lily Harley.

Chaplin's mother, who would later suffer severe mental issues and must be committed to an asylum, was able to support her family for a few years. But in a performance, that would introduce her youngest boy to

the spotlight, Hannah inexplicably lost her voice in the middle of a show, prompting the production manager to push the five-year-old Chaplin, whom he'd heard sing, onto the stage to replace her.

Chaplin lit up the audience, wowing them with his natural presence and comedic angle (at one point he imitated his mother's cracking voice). But the episode meant the end for Hannah. Her singing voice never returned, and she eventually ran out of money. For a time, Charlie and Sydney had to make a new, temporary home for themselves in London's tough workhouses.

Early Career

Armed with his mother's love of the stage, Chaplin was determined to make it in show business himself, and in 1897, using his mother's contacts, landed with a clog-dancing troupe named the Eight Lancashire Lads. It was a short stint, and not a terribly profitable one, forcing the go-getter Chaplin to make ends meet any way he could.

"I (was) newsvendor, printer, toymaker, doctor's boy, etc., but during these occupational digressions, I never lost sight of my aim to become an actor," Chaplin later recounted. "So, between jobs I would polish my shoes, brush my clothes, put on a clean collar and make periodic calls at a theatrical agency."

Eventually other stage work did come his way. Chaplin made his acting debut as a pageboy in a production of *Sherlock Holmes*. From there he toured with a vaudeville outfit named Casey's Court Circus and in 1908 teamed up with the Fred Karno pantomime troupe, where Chaplin became one of its stars as the Drunk in the comedic sketch *A Night in an English Music Hall*.

With the Karno troupe, Chaplin got his first taste of the United States, where he caught the eye of film producer Mack Sennett, who signed Chaplin to a contract for a $150 a week.

Sagheer Ahmed

Film Career

In 1914 Chaplin made his film debut in a somewhat forgettable one-reeler called *Make a Living*. To differentiate himself from the clad of other actors in Sennett films, Chaplin decided to play a single identifiable character, and "The Little Tramp" was born, with audiences getting their first taste of him in *Kid Auto Races at Venice* (1914).

Over the next year, Chaplin appeared in 35 movies, a lineup that included *Tillie's Punctured Romance*, film's first full-length comedy. In 1915 Chaplin left Sennett to join the Essanay Company, which agreed to pay him $1,250 a week. It is with Essanay that Chaplin, who by this time had hired his brother Sydney to be his business manager, rose to stardom.

During his first year with the company, Chaplin made 14 films, including *The Tramp* (1915). Generally regarded as the actor's first classic, the story establishes Chaplin's character as the unexpected hero when he saves the farmer's daughter from a gang of robbers.

By the age of 26, Chaplin, just three years removed from his vaudeville days, was a superstar. He'd moved over to the Mutual Company, which paid him a whopping $670,000 a year. The money made Chaplin a wealthy man, but it didn't seem to derail his artistic drive. With Mutual, he made some of his best work, including *One A.M.* (1916), *The Rink* (1916), *The Vagabond* (1916) and *Easy Street* (1917).

Through his work, Chaplin came to be known as a grueling perfectionist. His love for experimentation often meant countless takes, and it was not uncommon for him to order the rebuilding of an entire set. Nor was it uncommon for him to begin filming with one leading actor, realize he'd made a mistake in his casting and start again with someone new.

Sagheer Ahmed

But the results were hard to refute. During the 1920s Chaplin's career blossomed even more. During the decade he made some landmark films, including *The Kid* (1921), *The Pilgrim* (1923), *A Woman in Paris* (1923), *The Gold Rush* (1925), a movie Chaplin would later say he wanted to be remembered by, and *The Circus* (1928). The latter three were released by United Artists, a company Chaplin co-founded in 1919 with Douglas Fairbanks, Mary Pickford, and D.W. Griffith.

Off-Screen Drama

Chaplin became equally famous for his life off-screen. His affairs with actresses who had roles in his movies were numerous. Some, however, ended better than others.

In 1918 he quickly married 16-year-old Mildred Harris. The marriage lasted just two years, and in 1924 he wed again, to another 16-year-old, actress Lita Grey, whom he'd cast in *The Gold Rush*. The marriage had been brought on by an unplanned pregnancy, and the resulting union, which produced two sons for Chaplin (Charles Jr. and Sydney) was an unhappy one for both partners. They divorced in 1927.

In 1936, Chaplin married again, this time to a chorus girl who went by the film name of Paulette Goddard. They lasted until 1942. That was followed by a nasty paternity suit with another actress, Joan Barry, in which tests proved Chaplin was not the father of her daughter, but a jury still ordered him to pay child support.

In 1943, Chaplin married 18-year-old Oona O'Neill, the daughter of playwright Eugene O'Neill. Unexpectedly the two would go on to have a happy marriage, one that would result in eight children.

Later Films

Chaplin kept creating interesting and engaging films in the 1930s. In 1931, he released *City Lights*, a

Sagheer Ahmed

critical and commercial success that incorporated music Chaplin scored himself.

More acclaim came with *Modern Times* (1936), a biting commentary about the state of the world's economic and political infrastructures. The film, which did incorporate sound, was, in part, the result of an 18-month world tour Chaplin had taken between 1931 and 1932, a trip during which he'd witnessed severe economic angst and a sharp rise in nationalism in Europe and elsewhere.

Chaplin spoke even louder in *The Great Dictator* (1940), which pointedly ridiculed the governments of Hitler and Mussolini. "I want to see the return of decency and kindness," Chaplin said around the time of the film's release. "I'm just a human being who wants to see this country a real democracy . . ."

But Chaplin was not universally embraced. His romantic liaisons led to his rebuke by some women's groups, which in turn led to him being barred from entering some U.S. states. As the Cold War age settled into existence, Chaplin didn't withhold his fire from injustices he saw taking place in the name of fighting Communism in his adopted country of the United States.

Chaplin soon became a target of the right-wing conservatives. Representative John E. Rankin of Mississippi pushed for his deportation. In 1952, the Attorney General of the United States obliged when he announced that Chaplin, who was sailing to Britain on vacation, would not permitted to return to the United States unless he could prove "moral worth." The incensed Chaplin said good-bye to United States and took up residence on a small farm in Corsier-sur-Vevey, Switzerland.

Final Years

Nearing the end of his life, Chaplin did make one last visit to the United States in 1972, when he was given

Sagheer Ahmed

an honorary Academy Award. The trip came just five years after Chaplin's final film, *A Countess from Hong Kong* (1967), the filmmaker's first and only color movie. Despite a cast that included Sophia Loren and Marlon Brando, the film did poorly at the box office. In 1975, Chaplin received further recognition when he was knighted by Queen Elizabeth.

In the early morning hours of December 25, 1977, Charlie Chaplin died at his home in Corsier-sur-Vevey, Vaud, Switzerland. His wife, Oona, and seven of his children were at his bedside at the time of his passing. In a twist that might very well have come out of one of his films, Chaplin's body was stolen not long after he was buried from his grave near Lake Geneva in Switzerland by two men who demanded $400,000 for its return. The men were arrested and Chaplin's body was recovered 11 weeks later.

Golden points of his life for entrepreneurs:

1-Failure is unimportant; it takes courage to make a fool of yourself…

2-A day without laughter is a day wasted…

3-We think too much and feel too little…

4-Nothing is permanent in this wicked world - not even our troubles…

5-Life is a tragedy when seen in close-up, but a comedy in long-shot…

6-You'll never find a rainbow if you're looking down…

7-I don’t believe that the public knows what it wants; this is the conclusion that I have drawn from my career…

8-What do you want a meaning for? Life is a desire, not a meaning…

9-I suppose that’s one of the ironies of life doing the wrong thing at the right moment…

10-My pain may be the reason for somebody’s laugh. But my laugh must never be the reason for somebody’s pain…

11-Life can be wonderful if you're not afraid of it. All it takes is courage, imagination … and a little dough…

12-You need Power, only when you want to do something harmful otherwise Love is enough to get everything done…

13-I had no idea of the character. But the moment I was dressed, the clothes and the make-up made me feel the person he was. I began to know him, and by the time I walked onto the stage he was fully born…

14-Life is a beautiful magnificent thing, even to a jellyfish…

15-Your naked body should only belong to those who fall in love with your naked soul…

017

Larry Ellison

(Businessman, Entrepreneur)

Lawrence Joseph **Ellison** (**born** August 17, 1944) is an American businessman, entrepreneur, and philanthropist who is co-founder, executive chairman and chief technology officer of Oracle Corporation. ... **Ellison** was **born** in New York City and grew up in Chicago.

Background and Early Career

Larry Ellison was born in the Bronx, New York, on August 17, 1944, to single mother Florence Spellman. When he was nine months old, Ellison came down with pneumonia, and his mother sent him to Chicago to be raised by her aunt and uncle, Lillian and Louis Ellison, who adopted the baby.

After high school, Ellison enrolled at the University of Illinois, Champaign (1962), where he was named science student of the year. During his second year, his adopted mother died, and Ellison dropped out of college. The following fall, he enrolled at the University of Chicago, but he dropped out after only one semester.

Ellison then packed his bags for Berkeley, California, with little money, and for the next decade he moved from job to job at such places as Wells Fargo and Amdahl Corporation. Between college and his various jobs, Ellison had picked up basic computer skills, and he was finally able to put them to use as a programmer at Amdahl, where he worked on the first IBM-compatible mainframe system.

In 1977, Ellison and two of his Amdahl colleagues founded Software Development Labs and soon had a contract to build a database-management system—which they called Oracle—for the CIA. The company had fewer than 10 employees and revenue of less than $1 million per year, but in 1981, IBM signed on to use Oracle, and the company's sales doubled every year for the next seven years. Ellison soon renamed the company after its best-selling product.

Oracle Corporation

In 1986, Oracle Corporation held its IPO (initial public offering), but some accounting issues helped wipe out most of the company's market capitalization and Oracle teetered on the brink of bankruptcy. After a management shakeup and a product-cycle refresh, however, Oracle's new products took the industry by storm, and by 1992 the company was the leader in the database-management realm.

Success continued, and as Ellison was Oracle's largest shareholder, he became one of the wealthiest people in the world. Ellison set his sights on growth through acquisitions, and over the next several years he gobbled up several companies, including PeopleSoft, Siebel Systems and Sun Microsystems, all of which helped Oracle reach a market cap of roughly $185 billion with some 130,000 employees by 2014.

America's Cup

When he's not busy bolstering his software empire, Ellison races yachts (his yacht *Rising Sun* is over 450 feet long—one of the largest privately-owned vessels in the world), and in 2010 he joined the BMW Oracle racing team and won the prestigious America's Cup. The victory brought the cup to the United States for the first time in 15 years, a win the team repeated in 2013.

Philanthropy

In 2010, Ellison signed The Giving Pledge, an invitation to America's wealthiest to donate most of their wealth to philanthropic causes during their lifetime or after their death. In the accompanying letter, Ellison wrote, "Many years ago, I put virtually all of my assets into a trust with the intent of giving away at least 95% of my wealth to charitable causes. I have already given hundreds of millions of dollars to medical research and education, and I will give billions more over time. Until now, I have done this giving quietly — because I have long believed that charitable giving is a personal and private matter."

Larry founded the Ellison Medical Foundation, one of the largest supporters of research on aging. In 2013, the foundation changed to The Lawrence Ellison Foundation. Its broader mission is to support education, global health and development, and wildlife conservation.

Larry Ellison's bio is an extraordinary one. He has soared from humble beginnings as a teen lacking direction, without a college education, to reach astonishing heights of success. And he has an ego to boot! He told the Smithsonian Institution. "When I started Oracle, what I wanted to do was to create an environment where I would enjoy working. That was my primary goal. Sure, I wanted to make a living. I certainly never expected to become rich, certainly not this rich."

Awards:

Ellison's yacht USA 17 won the second race of the 33rd America's Cup. He and his BMW Oracle team returned to America from Spain in 2010 with the title, for the first time in more than a decade.

Suggestions of Larry Ellison to entrepreneurs:

1-Life's a journey. It's a journey about discovering limits

2-Great achievers are driven, not so much by the pursuit of success, but by the fear of failure

3-You have to act and act now

4-If you do everything that everyone else does in business, you're going to lose. The only way to really be ahead is to 'be different.

5-Being first is more important to me [than earning money]. I have so much money. Whatever money is, it's just a method of keeping score now. I mean, I certainly don't need more money.

6-I'm addicted to winning. The more you win, the more you want to win.

7-I have had all the disadvantages required for success.

8-You realize that life is short and fragile; and when you are facing walls of water, you understand your own mortality can change and how quickly things could change.

9-All you can do is every day, try to solve a problem and make your company better. You can't worry about it, you can't panic when you look at the stock market's decline. You get frozen like a deer in the headlights. All you can do is all you can do

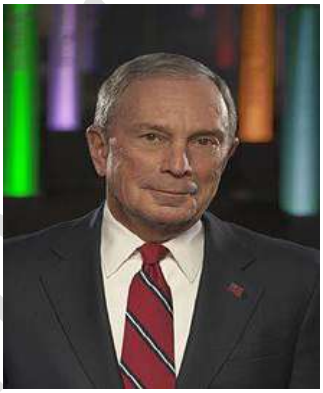
10-Taking care of your employees is extremely important and very very visible…

018

Michael Bloomberg

(Businessman, Author, Politician, Entrepreneur)

(born February 14, 1942) is an American businessman, author, politician, and philanthropist. His net worth is estimated at US$ 53.4 billion, as of July 2017, ranking him as the 6th richest person in the United States and the 10th richest person in the world. He has joined The Giving Pledge, whereby billionaires pledge to give away at least half of their wealth…



Early Life

Michael Rubens Bloomberg was born on February 14, 1942, in Boston, Massachusetts. The son of a bookkeeper, Bloomberg put himself through Johns Hopkins University and Harvard University, where he earned a Master of Business Administration degree in 1966. His first Wall Street job was with Salomon Brothers, where he quickly climbed the ladder, becoming partner in 1972.

Bloomberg L.P.

When Salomon Brothers was bought in 1981, Bloomberg started his own company, Bloomberg L.P., built around a financial information computer that revolutionized the way securities data was stored and consumed. The company was enormously successful and soon branched into the media business with more than 100 offices worldwide. As one of the wealthiest men in the world, Bloomberg chose to turn his attentions to philanthropy, with an emphasis on education, medical research and the arts.

New York Mayor

Bloomberg entered the political arena in 2002, when he won election as the 108th mayor of New York. Considered a liberal Republican turned Independent, Bloomberg is

Sagheer Ahmed

pro-choice and favored legalizing same-sex marriage. His most popular program as mayor was establishing a 311-telephone line that put callers in contact with the city, allowing them to report crimes, trash problems, or anything else. Bloomberg was re-elected mayor in November 2005.

Controversially, in 2008 Bloomberg could push through legislation allowing him to run for a third term as mayor, citing that the particularly difficult economic climate and his financial skills warranted his remaining in office. After spending an unprecedented amount of his own money (upwards of $90 million) on the campaign, Bloomberg secured a third four-year term in November of 2009 -- this time as an Independent, which he registered as two years prior.

Bloomberg stepped down from his political duties on January 2014 and spent that year focusing on his philanthropical pursuits before returning as CEO of Bloomberg L.P. Democrat Bill de Blasio took his place as New York City's new mayor.

During the 2016 presidential election, Bloomberg had considered running as a third party Independent, fearing that the candidates from both the Democratic and Republican parties were too extreme and would turn off many voters. However, in March, he officially reneged on pursuing the matter.

On July 27, 2016 Bloomberg spoke at the Democratic National Convention in support of Hillary Clinton, speaking honestly about how he came to endorse her, as well as his approach to politics.

"When I enter the voting booth each time, I look at the candidate, not the party label," Bloomberg stated in his prime-time speech. "There are times when I disagree with Hillary Clinton. But let me tell you, whatever our disagreements may be, I've come here to say: We must put them aside for the good of our country. And we must

Sagheer Ahmed

unite around the candidate who can defeat a dangerous demagogue," he said, derogatorily referring to Republican presidential candidate Donald Trump.

Major Works:

Michael Bloomberg is the founder of Bloomberg L.P., a financial software, data and media company headquartered in New York City. Formed as Innovative Market Systems (IMS) and later renamed, the company provides financial software tools such as an analytics and equity trading platform, data services and news to financial companies and organizations.

Awards and achievements:

- In February 2003, Michael Bloomberg received the Award for Distinguished Leadership in Global Capital Markets from the Yale School of Management
- In 2008, he received The Hundred Year Association of New York's Gold Medal "in recognition of outstanding contributions to the City of New York".
- He received a Healthy Communities Leadership Award from Leadership for Healthy Communities – a Robert Wood Johnson Foundation national program in 2009.

Philanthropic work:

As an individual who is passionate about giving back to the society, he is the founder of Bloomberg Philanthropies which encompasses all his charitable activities, focusing on five areas: the environment, public health, the arts, government innovation and education. Bloomberg has pledged to donate most of his wealth.

Net worth:

As of 2015, Michael Bloomberg has a net worth of $35.4 billion.

Suggestion from Michael Bloomberg to entrepreneur:

1-I don't believe that government is good at picking technology, particularly technology that is changing. By the time you get it done and go through democracy, it's so outdated.

2-I don't know why you should be proud of something. It doesn't make you any better or worse. You are what you are.

3-If we don't want to enforce laws on the books, we should remove them from the books. But when you have laws, you breed contempt if you don't enforce them.

4-If you look at people, whether in business or government, who haven't had any moral compass, who've just changed to say whatever they thought the popular thing was, in the end they're losers.

5-You don't make spending decisions, investment decisions, hiring decisions, or whether-you're-going-to-look-for-a-job decisions when you don't know what's going to happen.

6-If you really believe that you're making a difference and that you can leave a legacy of better schools and jobs and safer streets, why would you not spend the money? The objective is to improve the schools, bring down crime, build affordable housing, clean the streets - not to have a fair fight

7-Being an entrepreneur is not really about starting a business, it’s a way at looking of the world: seeing opportunity where there see obstacles, taking risks when others take refuge…

8-If you don’t encounter setbacks in your career, if you don’t have doubts and disappointment, let me tell you, you are not dreaming big enough…

9-Life is too short to spend your time avoiding failure…

10-Don’t be afraid to assert yourself, have a confidence in your abilities, and don’t let the bastards let you down…

11-You must first be willing to fail, and you must have the courage to go for it anyway…

12-Cities with clean air gain an economic advantage, because where people want to live and work, business want to invest…

13-I have always respected those who tried to change the world for the better, rather than just complain about it…

14-If somebody tells me, they skied all day and never fell-down, I tell them to find another mountain…

019

Sergey Brin

(Computer Scientist and Internet Entrepreneur)

Sergey Mikhaylovich Brin (born August 21, 1973) is a Russian-born American computer scientist and internet entrepreneur. Together with Larry Page, he co-founded Google. Brin is the President of Google's parent company Alphabet Inc.

Early Life

Internet entrepreneur and computer scientist Sergey Mikhaylovich Brin was born on August 21, 1973, in Moscow, Russia. The son of a Soviet mathematician economist, Brin and his family emigrated to the United States to escape Jewish persecution in 1979. After receiving his degree in mathematics and computer science from the University of Maryland at College Park, Brin entered Stanford University, where he met Larry Page. Both students were completing doctorates in computer science.

Google

As a research project at Stanford University, Brin and Page created a search engine that listed results according to the popularity of the pages, after concluding that the most popular result would often be the most useful. They called the search engine Google after the mathematical term "googol," which is a 1 followed by 100 zeros, to reflect their mission to organize the immense amount of information available on the Web.

After raising $1 million from family, friends and other investors, the pair launched the company in 1998. Headquartered in the heart of California's Silicon Valley, Google held its initial public offering in

Sagheer Ahmed

August 2004, making Brin and Page billionaires. Google has since become the world's most popular search engine, receiving an average of more than a trillion searches a day in 2016.

Success, Technology and Expansion

In 2006, Google purchased the most popular website for user-submitted streaming videos, YouTube, for $1.65 billion in stock.

In 2012, Google unveiled its futuristic Google Glass, a type of wearable eyeglass-computer which featured touchpad and voice control, a LED illuminated display and a camera, to the public. While touted as the latest "it" in tech toys, concerns over privacy and safety and a lack of a clear purpose in everyday life ultimately stymied its success in the commercial market. Its technology however has been applied for several uses in healthcare, journalism and the military.

On August 10, 2015, Brin and Page announced that Google and its divisions were being restructured under the umbrella of a new parent company called Alphabet, with Brin and Page serving as Alphabet's respective president and CEO.

In November 2016, Brin was ranked No. 13 on *Forbes*' "Billionaires" list, and No. 10 among U.S. billionaires who made the list. According to Forbes.com, as of November 2016, Brin's net worth was $37.9 billion. As director of special projects at Google, Brin shared the company's day-to-day responsibilities with Page, who served as Google's CEO, and Eric Schmidt, executive chairman of the company.

Major works:

- The formation of Google is Sergey Brin's biggest accomplishment so far. The company that he co-founded from a garage in 1998 has witnessed tremendous growth and success within such a short period. Brin and Page have revolutionized

the way the world searches for information online.

- Google.org, the philanthropic arm of Google.Inc, was formed in 2004 to work in domains that affect the society at large. It develops technologies that help to address global issues like education, energy crisis, hunger management, etc.

Awards and Achievements:

- Brin, along with Larry Page, was named as among the top 100 innovators in the world under the age of 35 by the MIT Technology Review TR100.
- Brin and Page received honorary MBA degrees from IE Business School "for embodying the entrepreneurial spirit and lending momentum to the creation of new businesses."
- The Marconi Foundation Prize, regarded as the "Highest Award in Engineering" was bestowed upon Brin and Page in 2004, and they were elected Fellows of the Marconi Foundation at Columbia University.
- In 2004, Brin was inducted into the National Academy of Engineering for "leadership in development of rapid indexing and retrieval of relevant information from the World Wide Web."

Trivia:

- The name Google is a play on the word 'Gogool' which is the largest number (digit 1 followed by 100 zeros).
- He possesses a mutation of the LRRK2 gene which increases his likelihood of developing Parkinson's disease at a later age.
- He and Larry Page co-own a customized Boeing 767-200 and a Dornier Alpha Jet

Net worth:

As of July 2017, his estimated net worth is US$45 billion and he is the 12th richest person in the world.

Suggestions of Sergey brin to entrepreneurs:

1-Solving big problem is easier than solving small problem…

2-Obviously every one want to be a successful, but I want to be a looked back on as being very innovative, very trusted and ethical, and ultimately making a big difference in this world…

3- I wish there were a hundred services with which I could easily look at such a book, it would have save me a lot of time, and it would have spared google a tremendous amount of efforts…

4-If what we are doing is not seen by some people as science fiction, it's probably not transformative enough…

5-Technology is an inherent democratizer, because of the evolution of hardware and software, you are scale-up almost anything, it means that in our life time every one may have tools of equal power…

6-The name was supposed to be 'Googol' which means 1 followed by 100 zero, it was before the spell checker existed…

7-We came up with the notion that not all web pages are created equal, people are-not web pages…

8-Any conversation I have about innovation starts with ultimate goal…

9-People try new things all the time, by now people succeed have to be very sophisticated…

10-It's not enough not to be evil, we also actively try to be good…

11-We would not survive if people did not trust us…

12-I am sometime something of a lazy person, so when I end-up spending a lot of time using something myself –as I did with Google in earliest of the days, I knew it was a big deal…

020

Mahbina Waheed

(Entrepreneur, a ceramist, and a product designer)

To become a female entrepreneur in Pakistan, let alone in the ceramic industry, lot of guts. But Mahbina Waheed does it with sheer passion. Clayworks, a Lahore based company, is an innovatie business that was started off solely by Waheed in 1999, after borrowing some money from her mother.

Mahbina left her job with a microfinance company, because she realized that there was no future and she wanted to produce hand painted modern ceramics. She said that she has always been educated and brought up to believe that she should have a career, make a difference and do something remarkable. After starting her own business, she has discovered that entrepreneurship, product design and ceramics are her calling.

Despite having no experience, she teamed up with her friend Zainab, found a factory they could work from, and produced a few hundred mugs which sold out. Inspired by this initia success, the duo started their business, Clayworks, in 1999 to manufacture hand painted ceramic tableware and accessories. With an ethos tha her products should be practical yet creatice, and durable but fun, Mahbina has created a stunning range, from cups and plates to serving dishes and tea sets. The Clayworks product range is constantly expanding, and the business also supplies crockery to hotels and restaurants, as well as a range of customized corporate gifts. Following the unfortunate death of her ceramics expert,and the

decision by her partner to leave the company in order to bring up her family, Mahbina took control to drive the business forward.

Since then Mahbina has transformed herself into a ceramics expert, and has introduced state of the art production technology. This has led to a doubling of production, and the business now provides employment for 50 people. Waheed explains that business instincts run deep in her blood as she has "the genes from my grandfather who was a businessman." Today, she is proud of the fact that she "runs the only ceramic factory owned by a woman entrepreneur, with most of the managerial staff also belonging to the female gender."

When ask from where you get the idea of your current business and how you have taken out the solution of the problem facing by the people and that solution gave you a business opportunity? She replied that it was her original idea and it was not being made in Pakistan of this variety, quality and design, so there was a gap in the market. Now people do not need to import or buy from abroad, they can buy high quality good design and colourful ceramics made in Pakistan as well. Restaurants and hotels and large chain stores can get them custom made in Pakistan as well. Restaurants and hotels and large chain stores can get them custom made in Pakistan now instead of being stuck with only whaqt is available in the market. As well as being the only female run ceramics factory in the country, Clayworks has become a well-known designer brand in Pakistan. Mahbina's aim of revolutionizing the country's ceramics industry is being realized, and her ultimate ambition is to lay a part in the in the industrialization of Pakistan.

Company overview:

Clayworks has been Pakistan's leading manufacturing ceramics since 1999. Clayworks is a ceramics design and manufacturing firm. They make products in ceramics that are innovative, fun blending tradition with modernity. Design, shape, form and function are integral in all our products. They have a vast range of products that serve the hotel and restaurant

industry, home use items, offices, give-aways and decorative tiles. The incredible popularity of Clayworks ceramics has attracted a growng number of customers, including long-term contracts with the wholesaler Metro, and the Carrefour retail chain. Clayworks also sells direct to the public through its two stores in Lahore and Islamabad.

Products:

Mugs, plates, tea sets, serving bowls, serving dishes, trinkets, accessories, tiles etc.

Mission:

To make beautiful, fun, funky yet functional ceramics that is of superior quality.

Suggestion from Mahbina Waheed to entrepreneurs:

1-Job person has no future but entrepreneur…

2-Believe that "if you are educated then you should have a career, make a difference, and do something remarkable…

3-Patrotic to the core, we should be proud of the label "Made in Pakistan" …

4-We make items(for) people, primarily to eat or drink from(but) they also have to be user friendly…

021

Syeda Tuba Waasay

(Owner of whispering emotes, Entrepreneur)

Syeda Tuba Waasay is the owner of whispering emotes and one of the women entrepreneur in Pakistan, she is doing a very creative work according to the needs of customer she makes Hand Made cards, Handmade stamps, Hand-made diaries, Handmade scrap books, frames for the pictures, Hand-made Greeting cards, Note-cards. She has not got training from anywhere, all she does is put her heart in to whatever she creates, and she create complete customized art work. Her academic qualification is PhD. Informative Sciences 2009, she is belong to stable family that's why she did not performed any job before, but still think that work is a vital part of our live and liveliness that's why she started her own business through her personal saving, when she started her business she face lack of motivational, moral support, work and family life balance and honest and trained workers, she have 10 to 20 employees, she is married and don't have any support from her home but still she is trying to manage her business and partial agreed that it's very difficult to start doing business in Pakistan specially being a woman because.

Company Overview:

Syeda Tuba Waasay laid the foundation of this business back in 8th September 2011, when she felt that there are so many ways to "express" your emotions. Thus, the name whispering Emotion eventually means those emotions those emotions which just whispers and you can express them when you contact her.

Whispering Emo-Tees provide you Hand-Made Cards, Hand-Made stamps, Hand-Made diaries, Hand-Made scrap books, frames for the pictures, Hand-Made Greeting cards, Note-Cards, It's a platform for all of you, who want to express in a special way, what cannot be expressed through an E-Card, an email, an sms or a phone call!

Peoples can email or call them; the best way to contact them is from Facebook and Twitter page! Here at Whispering Emo-Tees first try to grab the idea from the customer then they look forward to plan the design and execute it by their very own hands! Once the design is completed they sent that by TCS or any other courier service.

Products:

We design and craft the hand-made art work! It's not just the Cards, we also have hand-made stamps, hand-made diaries, hand-made scrap books, Frames for the pictures, hand-made greeting cards, note-cards, jewelry, Tags,T-shirts.

Suggestions from Tuba to entrepreneurs:

1-Work is a vital part of our live, and liveliness…

2- Men are dominating men only, the world has always been woman dominated, else Adam would never have been sent on the earth…

3-It is very good choice for woman to start her own business, because a quiet revolution is taking shape right now among woman…

4-Wome just do things differently in the world of business and different should be welcomed…

022

zeenat Ayesha

(Entrepreneur)

Zeenat, better known as Gina, has given a practical shape and form to her academic specialization. She was in Saudi Arabia when she wanted to go abroad to study.Her father, who was a brigadier at that time, declined by saying he cannot afford. She took a job

in a multinational and earned her way to foreign education. She did a Diploma in Hotel and Restaurant Management from the Conrad Hilton college, University of Huston. After working as an intern for various restaurants as chef-helper, accounts assistant and various other restaurant-related jobs, she had the strong realization that there was no future in seeking a good job in this field. She had the strong realization that there was no future in seeking a good job in this field. She then decided to do something on her own and started the first original Italian restaurant in Islamabad. Her father provided financing for the project. It was as a big risk, as Islamabad was not an easy city for a food business. However, what started as an eight-table restaurant, proved a success from day one. It was the right concept at the right time.Islamabad hand no international food chain and an Italian restaurant proved a treat for customers. Under the able supervision of Gina, and her original recipes, the small eatery, which started in 1989, has flourished into a double storey 40-table restaurant in Islamabad, with another branch in Rawalpindi. Since 1998, Gina has expanded her food business by Gina to maintain an ever-rising progress in the food business.

There are more than 20 employees in her restaurant. Pakistan is basically a male dominated society, especially in the field of business, but still she

found co-operative attitude of men's she is highly agreed that it's very difficult to start doing business in Pakistan specially being a woman. She also doesn't you have proper work support at home like maids, parents, in-laws etc. The main problems she faced, when she started her business are lack of confidence and shyness, financial problems, work and family life balance, honest and trained workers, very high cost of raw material, lack of proper information, guidance and advice about to run business affairs and lack of motivational and moral support. She took an initiative to have her own business because of rising cost of living and high expenses, for the purpose to upgrade your life style and she saw in her surrounding that women have started working, so she thought that if she also got this independence than she will be able to utilize her capabilities in better way.

Company overview:

"Our mission is to satisfy the customers and make the chain of restaurants"

Pappasallis, an Italian Cuisine popped up on the map of the Federal Capital on 2nd October 1989. Though a small place with only eight tables to start with, Pappasallis made an instant impact. Since then Pappasallis, one of the pioneers in Restaurant business has emerged as a lead Restaurant and still holds that position. While the whole city sleeps, Pappasallis is very much alive with food and music lovers.

Their hall mark is their team work. Most of their staff members has been with them since the inception of Pappasallis. Their friendly employee management policy breeds lasting associations, job satisfaction and aggrandizement. Guest's satisfaction is their motto and your recurring visit is our pride.

So, if anybody want to enjoy real Italian food and also want to party then Pappasallis is the perfect place.

Products:

Pizza, burgers, desserts, appetizers, Pasta, Soups, Salads, Cakes and beverages.

Specialties:

Breakfast, Lunch, Dinner, Coffee and Drinks.

Services:

- Takes Reservations
- Walk-Ins Welcome
- Good for Groups
- Good for Kids
- Take Out
- Waiter service

Advice of Zeenat Ayesha for entrepreneurs:

1-Finding job is called dependency, starting business is the opportunity…

2-Progress always involve risk but control…

3-I have always kept a strong check on the working conditions at my restaurant, and try to maintain a personal rapport with all customers…

4-It is a good choice for ladies to start doing their own business in male dominated environment…

5-20th century women can do anything and manage everything and skills to take decision and manage everything…

6-Before starting own business firstly you should start the business on small scale and then take step forward after getting some experience…

  Field Of Study Quran,
  Dates attended or expected graduation 2014 - 2015
- Khadim Ali Shah Bukhari Institute of Technology
  Degree Name BS
  Field Of Study Software Engineering
  Dates attended or expected graduation 2002 - 2006
- D. J. Science College
  Degree Name HSC
  Field Of Study Maths, Physics, Chemistry
  Dates attended or expected graduation 1999 - 2001
- Karachi Public School
  Degree Name SSC
  Field Of Study Pre Engineering
  Dates attended or expected graduation 1992 - 1999

career and professional life

- **PPH.com** Magento Specialist/ Consultant / Freelancer
  Company Name PeoplePerHour.com
  Dates Employed Nov 2014 - Present Employment Duration 3 yrs
  I received my welcome email from PPH in 2015 start. Within a short time frame I earned "Top Dev" rank and am now enjoying "2nd best dev", position

Sagheer Ahmed

Mostly working on high end Magento and Laravel products and providing consultancy to my valued clients all across the globe including UK, USA, Canada, UAE and Australia.

- **ODesk**
  Consultant / Freelancer
  Company Name oDesk
  Dates Employed Feb 2012 – Jan 2015 Employment Duration 3 yrs

  I am working on all major open source platforms on oDesk. I have list of happy clients, high ratings and positive feedback. I have recently received an exclusive invitation from oDesk which says
  "Hi Syed Zeeshan Haider,

  Great news! Your high-quality work and strong performance in the Web Programming category has earned you an invitation to join our oDesk Verified Web Developers group.

  As a member of this exclusive group, you will stand out with a badge on your profile and oDesk recruiters will recommend you to clients."
- **Next Generation Innovations (NextGenI)**
  Technical Project Manager
  Company Name Next Generation Innovations (NextGenI)
  Dates Employed Jan 2014 – Oct 2014 Employment Duration 10 mos
  Location Karachi

  I am managing a leading online store Lagarconne.com. My responsibilities include but not limited to the following
  * Daily client communication /scheduled calls
  * Planning weekly tasks for team
  * Monitoring work progress
  * Mentoring team members

Sagheer Ahmed

* Providing technical trainings.
* Database design
* System architect
* Code review
* Production release
* Training new resources
* Server management
* Interview new resources
* Inducting new resources

- **folio3**
  Team Lead
  Company Name Folio3
  Dates Employed Aug 2012 – Jan 2014 Employment Duration 1 yr 6 mos
  Location Pakistan

  Working as a team lead for an offshore client, Barnes & Noble bn.com. My responsibilities are leading a team of developers and help them understand client's requirement, working on complex tasks, coordinating with QA team, code review, mentoring junior staff, releasing builds and maintain databases.
  Edit position Senior Software Engineer
- **TradeKey**
  Senior Software Engineer
  Company Name TradeKey
  Dates Employed Apr 2009 – Aug 2012 Employment Duration 3 yrs 5 mos
  Location Karachi, Pakistan

  In TradeKey.com I have worked on number of projects and my key achievements are:
  • Increased per day inquiries to 200 percent.
  • Reduced per inquiry cost to 50 percent.
  • Increased per day product posting to 100 percent.
  • Exponentially increased number of trade alerts per day.
  • Improve page view time with YouTube and Youku

Sagheer Ahmed

integration.
• Reduced server cost and page load time using Sphinx, Memcached and optimizing queries.
• Made communication more responsive, decreased email bounce ratio and removed dead ends.
• Created complex bots to help members automatically importing large amount of data from other portals including Alibaba and Made In China in no time.
• Worked on six language portals for localization; targeting more traffic and adsense revenue.

9. start work intelligently
10. share responsibility
11. filter opportunities
12. work less, earn more

024

Anum Kamran

(Educationalist and Entrepreneur)

1-Early life and education:

Early schooling from Pak premier public school was not so famous or big. But built my foundation very solid. Went for a better school for 9th and matric which was Hilton public school. Did my matric with biology as major. I was always position holder but in matric I didn't show up great. Got admission in APWA college for intermediate pre engineering. After that applied to many universities like IBA, FAST, Baharia etc. but ended up at Jinnah University for women. Due to some personal reasons.

Did BS. in I.T from there got married in last semester but completed BS. successfully with highest GPA. During BS. started Apex Solutions with Kamran. And on n off continued working with him from home. During my education life before marriage I always kept myself busy in something like did so many short courses of arts and crafts, painting, sketching, IT courses and what's not. I had very restless personality. To stay free was not my cup of tea. I always love to be busy. That's why never spent any vacation spare. I did home tuitions to different classes and taught in schools as well before my bachelors.

After bachelors started finding options for MS as I had no child at that time and was free but I was not able to find any suitable Option according to my timings. Luckily Jinnah University announced first time MS and that was only for weekend and it was absolutely according to my timings. I instantly picked it up and started my MS in software engineering.

Almost all courses of MS were completed when I got pregnant so stopped working on thesis. After first baby completed my thesis and got the degree.

I also worked as visiting faculty lecturer before and during my MS.

2-Career and professional life:

Never did any 9-5 job at any company because again I was not allowed to do. Teaching was allowed hence taught as lecturer.

But I am thankful for the barrier due to which I started my entrepreneurial journey as I had that restless ness in my personality and I was not able to spend my time doing nothing.

Entrepreneurship is in my blood, my forefathers were businessmen, my father also started so many businesses but failed in all, and his failure was my biggest inspiration.

After a kid spending time at office with Kamran was not easy. At same time I got chance to import some stuff for my friend, and that was the clicking point. When I took it as serious business. Apex Solutions was our home stuff so development of an ecommerce portal was a piece of cake. Requested Kamran to dedicate a team for my project and imported some stuff. Started my venture Buyon.pk as an estore. Where I was selling my own inventory and that is totally from home. I met breakeven in a month.
After successfully running Buyon as an estore from home I was always receiving praises from friends and family that how you manage all this with home and kid. And there another idea clicked that why shouldn't I help others as well. If I can run and earn with my ease why not other people especially women. Hence we converted buyon from estore to marketplace. Where we invited different sellers to sell their products. This conversion happened in 2014 and now sky is not the limit.
Buyon is Anum and Anum is buyon. It is now third leading marketplace in Pakistan.

3-Awards and achievement:

During education I was always position holder . Had bad grades in matric and inter. But again in BS and MS got highest GPA.

I got failed at entrance test of IBA, today IBA students work for me as interns and I have been invited at iba and many other universities for a guest speaker sessions and panelist. Have been invited at many panels of world bank and USAID.

Another achievement which I think I have on my shoulder is to be an inspiration for friends and family. After forefathers' no one was continuing business as a career but after my success as an Entrepreneur so many people in my family have started their businesses and I am very proud of myself being an inspiration for them to follow our forefathers steps.

4-Suggestions for new entrepreneurs:

1. Entrepreneurship is about creating a value in someone's life by solving a problem. Money is by product of it. Don't mix Entrepreneurship and business.
2. Entrepreneurship is a lifestyle
3. Must have a mentor or mentors in your life.
4. Don't assume you are going to sleep on a bed of roses as soon as your startup. It takes a lot of efforts and courage to be an entrepreneur.
5. Take each failure as an opportunity, because it will tell you how not to work.
6. You are not on the right path until people start calling you crazy.
7. Be innovative, that's the only way you can compete with your competitors.
8. Initially try to be a master of everything. Get your hands dirty in order to feel every piece of your startup. Once stabled, start delegating responsibilities.
9. Don't indulge yourself into operational task all the time, it will kill your productivity.
10. Keep your self-connected with the end-user/customer.

11.there is no off time, no weekends , no holidays for an Entrepreneur.
12. Hussle Hussle and Hussle. That's the best mantra to become a successful Entrepreneur.

Now he has designed a unique courses e.g. Personality Development, Human Health Awareness, Pre-Marriage Awareness, Seven session program for habit change ...for detail visit: www.kunworld.com

Golden points of his life:

1. Man is great because man's creator is great
2. Money and fame are the by-product of your SMART working…
3. Your question is the missing jigsaw of your big picture…
4. Every problem has at least one solution and I think so more than one…
5. Uniqueness and struggle decide the price of your products…
6. Truth is simple, which is not simple that is not truth…
7. Believe needs knowledge, and knowledge needs curiosity and research…
8. The mind cannot be creative if you are always busy, always talking, always pursuing tangible end…
9. Attempt is the first step of success…
10. Decision requires arrangement…
11. You are too important to Allah therefore He created you…

Munebba Mizari

(Artist, motivational speaker ,Model)

Muniba Mazari (born 3 March 1987) is a Pakistani artist, model, activist, motivational speaker and television host. She uses a wheelchair due to injuries sustained in a car accident at the age of 21 which makes her Pakistan's first wheelchair bound model. She is also the National Ambassador for UN Women Pakistan.She is also a singer and activist.

Early life:

Muniba Mazari is of Baloch background.[3] In 2007, Muniba met a car accident in which she sustained multiple injuries including spinal cord which led her paraplegic. Along with philanthropic efforts, she has established her brand known as *Muniba's Canvas* with the slogan *Let Your Walls Wear Colors*. Her medium is acrylics on canvas

Life changing story:

- Muniba Mazari’s life changed in 2007, after a car accident which destroyed her body. After 2 yerars painful in hospital, she finally decided to rise up, Muniba Mazari’s husbancd divorced her because of her disability and she was left alone with her son Neal. Not only her husband, but her father also left their family in such pain.
- She spent 2 years in hospital bed and those were the most difficult years of her life. She felt helpless. She used to chop her hair off, in frustration, when they used to get stuch in hair brush. But her bravery started dominating all these painful feelings.

- She is a divorced mother and abandoned daughter, but instead of moaning she summoned up her courage and nourished her son alone. According to Muniba Mazari, her true strength was always her mother who continuously motivated her and heightened her spirt.
- Because of encouragement by doctors, she started her old passion, painting, her brother Omar supported her a lot during her days I hospital. She did not blame others for all these events instead became a source of positive energy for others.

Career:

Muniba Mazari is a first wheelchair anchor. She was an occasional anchor and hosted a show on PTV. Mazari was selected as an inspirational woman in 2015 by BBC,and She was one of the two Pakistanis to be named BBCs 100 most inspirational women in 2015. Toni&Guy hired her as a model in Pakistan which makes her first wheelchair-using model. In 2016, She was featured in the **Forbes 30 under 30**. Mazari is currently a Brand Ambassador for RYTHM Foundation of QI as well as for UN Women Pakistan. She is motivational speaker and has given motivational talks on various platforms like TEDx, Entrepreneurs' Organization (EO), Young presidents' Organization (YPO), Youth Entrepreneur Organization (YEO), Global Leadership Conference (GLC) 2016, VCon Malaysia 2017, Vcon Dubai 2017 , Leadership Summit Pakistan, etc. She is Pakistan's first Goodwill Ambassador for UN Women. Muniba is one of the Forbes 30 under 30 for 2016 in Media and Marketing Category and is also the anchor person of Pakistan's National Television. She is also a CSR head for Chughtai Labs.

Suggestion of Muniba Muzari to entrepreneurs:

- The hardest battle you are ever going to fight is the battle to be just you…

- I survived because the first inside me burned brighter than the fire around me!

- You owe your success to those who doubt your worth and your abilities!

- The most beautiful piece of art is the one which is created in the most bitter state of agony…

- For healthy mind stay positive, surround yourself with people who have positive influence on you…

- Any woman with determination, courage confidence, and a voice can be a role model for all!

- The secret of happiness is being grateful for, what you have, not what you don't have or what you have lost…

- I am caged by my body, but my mind is free, so is my soul, so is my spirit…

- Weakness is not always negative…

- Being different is an opportunity…

- Life is short embrace everything…

- Patience can get you through almost anything

027

Sandeep Meshwani

(Motivational speaker, Entrepreneur)

Sandeep Maheshwari is one of the fastest growing entrepreneurs of India. He is the founder and CEO of Imagesbazaar.com, (A Venture of "Mash Audio Visuals Private Limited Company) the largest collection of Indian images.Imagesbazaar has over 1 Million images of Indian models with a network of over 11,500 photographers all over India. Without diving too much into his professional success, what makes him a lot different from other is that he is also a motivational speaker and is known for his 'Free Motivational Life Changing Seminars' to motivate and inspire the minds of the young.

Early Age:

Sandeep resides in New Delhi, India. When he was **13** years old, his family thought that he would do with his **moped** (a light two wheeler) that was gifted to him by his father. Little Sandeep would travel and move in Delhi, a city with enormous traffic on roads. Therefore, he learned practicality day by day from the real life situations.

His father was amazed to see that he came up with an idea of making money with his little moped. He rented his scooter to his friend which would take his girl to a ride. Within few months, he was known for renting two-wheeler and was earning Rs 50($0.8) per hour with a condition that the customer had to bear all the fuel

expenses! That is, he was now in a complete profit! Yes, don't be crazy counting the Maintenance expenses.

But a few years later, Sandeep's father had a tough time in his **Aluminium business.** All the burden and responsibilities were now shifted to Sandeep's head. He knew that this is his time to support his family. His time had come at a meagre age of **19.** But Mr Maheshwari had a mind of his own and as we all know he tried a number of Businesses and successfully landed at **ImagesBazaar**

Turning point in life:

After a two week course in photography, he purchased a camera worth Rs.12,000($200). With fear and a mission in mind, he started port folioing models at very minimal rates. Then he had to face another problem, that is the Modelling agencies wanted the photographer to be great and renowned. All models came to Maheshwari asking for his milestones and poor Maheshwari had no reply. Sandeep knew that now he has to do something big.

This time Sandeep had an enormous goal in mind, that is to increase his popularity among modelling agencies, aimed at creating a world record.

Sandeep meshwani---on business:

The example he quotes that they use fancy clothing brands eg **ZARA** in their photo shoots but ultimately they clear off the names in the editing process.

He says the thing that gives me **immense satisfaction** is that I am building a long term business by actually delivering a quality product ie Images in his case to his customers. Because he knows that the cost of that T-Shirt maybe Rs 5000 but the value actually exists in it. He could have used a Rs 500 T-Shirt for the shoot without the customer getting aware of it. But No!
Business is also dependent on your **optimism**, which in this case would not have reached that extent by using that local T-Shirt instead of an elite brand. This is what makes **Radically Successful Businesses.**
He said, his idol in Business and Entrepreneurship is **Steve Jobs.** As he even used to design the internal circuitry of the iPhone which in case no would see but the company would know that they have done more than the customer wanted and required.
That's why Steve Jobs is called a **Visionary.** Yes, the guy who used to wear a Black Hoodie and Blue Jeans with White Sports shoes all the time! A photo showing Mark Zuckerberg and Steve Jobs wearing their "all time" dress codes! Why? Because they say this helps them better to concentrate on their work.

Mission of Sandeep Maheshwari – Broadening Horizons of People Mentally & Emotionally

Not overwhelmed by his success, Mr.Sandeep Maheshwari is even now in 2017 conducting **'Motivational Life Changing Seminars'** all over the India to inspire and

motivate the minds of the young. He actually focuses on the Reality than the Positive side of the future. He aggressively promotes Realistic Thinking over Positive Thinking as thinking positively is erodes the problem at the present but doesn't necessarily get done with it. Absolutely, Sandeep Maheshwari Wiki accounts to an amazingly thrilling conclusion.

He says Solution oriented mindset is what we all need to practice especially in times of Adversity. Most of us feel challenged and deprived when we fail but most of us know that failure leads to success. For you to go to your destination it's not necessary that you need to know the Whole Elaborated Path on a Sheet of Paper!

Life has its own Twists and Turns which make us Stronger!

Mile stone of Sandeep Meshwani:

amongst his few awards, the ones that impressed me the most are;

- Creative Entrepreneur of the Year 2013 by Entrepreneur India Summit
- Honored as India's Most Promising Entrepreneurs by Business World Magazine
- Star Youth Achiever Award, Global Youth Marketing Forum
- Young Creative Entrepreneur Award by the British Council, a division of the British High Commission
- Most Amazing Creative Entrepreneur, 2013 by India Summit
- Award of Pioneer of Tomorrow, ET Now TV channel

- A hot topic of discussion in various news and television channels and publications

Golden points from his life:

- First you have to complete your own commitment, if you are not able to complete your own commitment then how can you complete those commitments that you have given to others.
- Either control your mind or it will control you.
- If you have changed your habits, then your life will be changed, otherwise it will be same as it was in past.
- Success comes from experience and experience comes from bad experiences.
- When you want to do the thing that nobody did till now, once this desire comes from your heart, then you don't have to do anything, that desire will do anything by using your body.
- If you want to choose desire, then choose bigger one, world's bigger desire.
- There are two types of persons, one type of person talk about big things like everyone will purchase my product, I will earn in lac rupees, I will sale all product etc. Whenever I meet such kind of person I just ask that how your first product will be sold, if one can be sold then you can sale 100 and 1000.
- The person who knows everything about why and what am I doing and how to do it then nobody can stop him.
- The difference between want and need is self-control
- Action without thinking and thinking without action will give you 100% failure.
- Body language speaks the loudest.

Saghe
